Grades 9-12

2022/23

If people could not see colours, how would traffic lights work?

With friends or family, design a traffic system that does not need colours.

You and your family must come up with an idea for a new invention that will either help your family or make their lives easier.

Working with your friends, create a plan for a special guest visiting your school.

Remember to include things like social media, speeches and catering.
