TECHNOLOGY LITERACY ACTIVITY:

Website Evaluation: Choose a website on a topic that interests you and evaluate it for credibility, relevance, and accuracy. Analyse how trustworthy the site information is. Use the criteria below to guide your evaluation.

Credibility:

Who created or manages the website? Is it an expert, a reliable organisation, or a trusted source?

Is the author or organisation clearly identified? Can you find their credentials or contact information?

Relevance:

Does the content of the website relate to the topic you're researching?

Is the information presented in an understandable and appropriate way for your needs?

Accuracy:

Can the facts and claims on the website be verified through other trusted sources?

Are there citations, references, or links to original sources?

Timeliness:

When was the website last updated? Is the information current and still applicable?

Bias:

Does the website present balanced information, or does it seem to favour one side or opinion?

Are there advertisements or sponsors that may influence the content?

Trustworthiness:

Does the website use a secure connection (e.g., does the URL start with "https")? Are there any indications that the site is reputable, such as awards, certifications, or professional affiliations?
