

# Flexibility

Grade 7

Mentee: .....

Grade: ..... Date: .....

### FLEXIBILITY ACIVITY:

Imagine a world where, overnight, all advanced technology stops working. People must go back to older ways of doing things - like writing letters by hand and using horse-drawn carriages. Think about a family who relies heavily on technology. What challenges would they face, and how would they have to adapt? What new values and priorities might they discover from living without modern technology? **Write at least 150 words.**
