FLEXIBILITY ACIVITY:

Sometimes being flexible is challenging, especially when it involves conflicting beliefs. It is the year 2053, and a large oil reserve has been found near the Ras Al Jinz Turtle Reserve, close to Sur. This discovery could create jobs and bring significant income to the country. However, the area is also a vital nesting site for thousands of turtles each year. Write a 100-word paragraph in favour of the oil development, focusing on the economic benefits, and a 100-word paragraph supporting the conservation of this unique area, emphasising the importance of protecting wildlife.
