

ARX

North America

The image shows the interior of a large, circular industrial tunnel. The ceiling is composed of large, dark, corrugated metal pipes that curve downwards towards the center. The floor is wet and reflective, showing the overhead pipes and lights. On the left side, several large, dark pipes run horizontally across the frame. A single yellow pipe is also visible among them. The right side of the tunnel features a red-painted wall and more pipes. The perspective is looking down the length of the tunnel, which recedes into the distance where more lights and pipes are visible.

Expanding our Reach in North America

Our local capabilities are powered by the depth of a global group

Our presence in the U.S. continues to grow — anchored by our Washington D.C. office, we’ve expanded through strategic projects, strengthened partnerships, and a growing local team. This reflects both the trust our clients place in us and our deepening commitment to the North American market. Today, we deliver integrated services across three core sectors: Tunnels & Underground Structures, Hydropower, and Bridges. Backed by strong local teams, we offer end-to-end solutions — from concept through design — tailored to the unique demands of each project and client. Our local capabilities are powered by the depth of a global group with decades of experience in complex infrastructures.

While our focus in North America is rooted in today’s infrastructure needs, we are constantly looking ahead — drawing on international expertise to help shape resilient, sustainable, and intelligent systems.

We’re proud of the progress we’ve made and even more energized by the opportunities to help our clients build what’s next.

Roberto Schürch
Chief Regional Officer North America

Our branches act as entrepreneurial units, developing their own networks and relationships. This strengthens the entire group. They develop local know-how and combine it with global best practices, offering a full-service package to our clients.

Our **Glocal**

approach

is central
to everything
we do

We are actively present in:

Albania, Argentina, Australia, Austria, Bolivia, Brazil, Chile, China, Colombia, Denmark, Egypt, Ecuador, France, Germany, India, Israel, Italy, Nepal, Norway, Panamá, Perú, Portugal, Saudi Arabia, Spain, Switzerland, Tunisia, Türkiye, United Arab Emirates, USA

Our
multidisciplinary
teams are made
of

People

We are a comprehensive network of specialists, always integrating talent and expertise. Tackling complex design projects, ARX adapts and evolves with the dynamic and challenging global landscape. Continual evolution leads to continual growth.

Experts

We are experts in select design disciplines, combining deep technical specialization with the ability to lead broad, multidisciplinary projects. This versatility empowers us to tackle challenges of any scale — from the highly precise to the broadly complex — with confidence.

ARX North America

Building the Future: ARX’s Commitment to Innovation and Community

Since its establishment in September 2022, Pini Group USA, now ARX, has been at the forefront of delivering cutting-edge engineering and consulting services across North America. As the Managing Director, I am proud to lead a team that embodies ARX global expertise while deeply engaging with local communities. Our growth is a testament to our commitment to excellence and our clients’ trust in our capabilities.

At ARX we prioritize innovation, sustainability, and inclusivity. Our diverse team collaborates to address complex engineering challenges, ensuring that our projects not only meet technical standards but also contribute positively to the communities we serve.

Brief technical overview

Areas of expertise

Infrastructure

Some of the largest infrastructure projects of our time comprise the core of our business. Using cost-efficient, sustainable solutions, ARX has designed and constructed traffic routes at local, national, and international levels.

City

We help our clients reach new heights in rapidly changing modern cities, providing reliable partnerships with our architects. Using creativity and innovation, we deliver on challenging urban projects.

Energy

From feasibility study to implementation, ARX is active in generating, distributing, storing, and consuming energy. In the increasingly complex energy sector, we are partners with our customers in seeking and analyzing solutions. Together we ensure their investments are sustainable and reliable long into the future.

Industry

The industrial world is evolving fast, with rising demands for quality, capacity, and cutting-edge tech. We’re here to help businesses stay ahead. From optimizing production and facility design to offering expert talent in mechanical and electrical engineering, we drive innovation and efficiency to meet the challenges of today and tomorrow.

Like an explosion of color, ARX has dramatic reach and vibrant potential. We celebrate our wide spectrum of expertise. At our core, we contain rare elements: unique thinkers and creators.

Racing towards a future of efficiency and sustainability. ARX is driven by these individuals. With every team member exploring the borders of what we know, our impact grows, and our potential expands. The ARX universe is a nexus of talent and innovation, where infinitely more is possible.

We are transforming communities one at a time, remaining focused on our mission:

Make it happen
