CARA
Sleep soundly.

CARA Sleep soundly.

The thoroughly modern nasal and full face masks in the CARA family satisfy patient requirements for a perfect fit, great wearing comfort, gentle, quiet exhalation and good skin compatibility.

Our successful CARA masks win over fans with their lightness, the soft, supple mask cushion, adjustable headgear, an excellent fit and other clever details.

CARA offers the right solution to nearly every mask wearer.

CARA goes on easily.

Loosen both clips from the mask.

Pull the headgear over your head.

Fasten the lower clips on the mask.

Adjust the upper portion of the headgear so that it is as loose as possible and as tight as necessary.

Adjust the lower portion of the headgear the same way so that it is as loose as possible and as tight as necessary.

Position the headgear on the head so that the lower portion does not hit the ear lobes.

Adjust the forehead support as loosely as possible; it does not have to lie on the forehead.

You'll find our user video on YouTube.

Mask cushion – stable with perfect fit

The mask makes a good first impression that lasts. The soft and supple mask cushion fits snugly and hugs the contours of the face, making it ideal for long wearing comfort even without a forehead cushion.

Bank on the best – sensational silence

The exhalation system located near the ball-and-socket joint has proven itself over the years. The slotted openings yield a diffuse air flow that does not disturb patient or bed mate while the closed upper area prevents air from flowing toward the patient's eyes. The system has been perfected in the CARA family of masks.

The limited number of parts simplifies operation, reduces the mask's weight and relieves the strain on the environment with less material production and disposal.

Award-winning CARA

CARA nasal could do more than convince you – it was awarded the international design prize Focus Open in 2018.

The independent Hohenstein Institute too is impressed by the headgear in the CARA family. Only trouble-free textiles that contain no substances harmful to human health are eligible to receive the Institute's internationally recognized OEKO-TEX STANDARD 100 seal.

The advantages of CARA

- Soft, supple mask cushion in three sizes
- Small and diffuse exhalation system **1a**, **1b**
- Lightweight **2**
- Color-coded headgear – colored (teal or syrah) part on top
- Upper portion of headgear can be adjusted for a perfect fit on any head size **3**
- Choice of manual threading or permanent assembly **4a**, **4b**
- Quick-release cord for rapid removal **5**
- Ball-and-socket joint with 360° and 3D rotation for freedom of movement **6**
- Extremely durable material

CARA - Made in Germany
