

Finance and Control Officer - Space Sector

When you are a 3 to 5 year experienced finance professional and striving for a broader role in finance within a scale up company, we are looking for you!

As a Finance and Control Officer at Bradford Space Luxembourg, you will play a crucial role in ensuring the efficient and effective recording, reporting and analysing financial information for management and stakeholders. You will work closely with internal stakeholders (project manager, site director and finance specialists in the Netherlands) and external relations as banks, auditors and other stakeholders.

Bradford Space is a world-leading specialist in Space operations, with capabilities in propulsion systems and spacecraft controls. Bradford Space Group has facilities in Luxembourg and the Netherlands. Bradford Space is a world-leading specialist in Space operations, with capabilities in propulsion systems and spacecraft controls.

Bradford Space Luxembourg is a typical scale-up company in a high-tech business. The job focuses on project control, process improvements and business analysis of financial data and cashflow. The function is also focused on financial control and the implementation of the financial and administrative policy and/or administrative organization. Also this gives you the opportunity to obtain broader management skills on HR, Legal and Procurement in a young, growing and dynamic environment.

Key Responsibilities:

The assigned main tasks are but not limited to:

- Recording, reporting and analyzing financial data in financial system (ExactGlobe/Synergy);
- Controlling Project budgets and Project reports;
- Oversee work in progress and ensure accurate and timely reporting;
- Monthly end close and reporting to stakeholders;
- Analyze and report financial data to support strategic decision-making;
- Implement improvements in financial processes to increase efficiency and accuracy;
- Preparation of yearly budget in consultation with the Site Director and CFO;
- Support the Site Director on HR/Legal items and implementing procedures for the company.

Qualifications:

- Minimum 3 years' experience in a Financial (control) Role;
- Bachelor's degree in Accounting or Finance;
- Experience in project control and IT-minded for processes and dashboarding;
- Knowledge on GAAP and Statutory accounting for Luxembourg;
- Ability to see improvements in procedures and processes and implementing changes in collaboration with specialists;
- Pragmatic, open-minded, flexible and positive attitude;
- The working language is English - any additional language would be considered a plus;
- Familiarity with HR/Company law is a plus.

What we can offer in return

We offer a varied job in an exciting industry where you play a key role in supporting the management and the development of the Bradford Space Group. Enjoy an attractive compensation package with good benefits, including a performance bonus, flexible working hours, and opportunities for professional development.

We offer you the ability to participate in creating the next subsystems that will enable all types of missions in low-earth-orbit and beyond as you would take on a valuable role in a small, revenue-generating company, that prides itself on its space heritage and its continuous adaptability to the space challenges.

Contract Type, location, and conditions

This is a full-time job located in Belvaux, Luxembourg with occasional travel possible. The role is open to candidates of any age, gender, orientation, that have work authorization within the EU.
