### The History of Computers

#### تاريخ الحواسيب

When you are using a computer, think about the technology that is needed for it to work. People have been using types of computers for thousands of years. A metal machine was found on the seabed in Greece that was more than 2,000 years old. It is believed that this was the first ever computer.

عندما تستخدم الكمبيوتر، فكر في التكنولوجيا التي تحتاج من أجل أن يعمل. الناس يستخدمون أنواع من أجهزة الكمبيوتر منذ ألف السنين. تم العثور على آلة معدنية في قاع البحر في اليونان التي كانت تزيد عن ٢٠٠٠ عام ويعتقد أن هذا هو أول جهاز كمبيوتر وجد.

In the 1940s, technology had developed enough for inventors to make the first generation of modern computers. One such model was so large that it needed a room that was 167 square meters to accommodate it. During that decade, scientists in England developed the first computer program. It took 25 minutes to complete one calculation. In 1959 CE, the computer chip was developed.

في الأربعينيات من القرن الثامن عشر، تطورت التكنولوجيا بما فيه الكفاية للمخترعين لصناعة الجيل الأول من أجهزة الكمبيوتر الحديثة. كان واحدا من هذه النماذج كبير بحيث انه يحتاج إلى غرفة بمساحة 167 متر مربع لاستيعابه. خلال ذلك العقد، طور العلماء في إنجلترا أول برنامج للحاسوب بحيث كانت عملية حسابية واحدة تستغرق ٢٥ دقيقة لاتمامها. في عام 1959 م، تم تطوير رقاقة الكمبيوتر.

The first computer game was produced in 1962 CE, followed two years later by the computer mouse. In 1971 CE, the floppy disk was invented, which meant that information could be shared between computers. The first PC was produced in 1974 CE, so people could buy computers to use at home.

وقد أنتجت اول لعبة كمبيوتر في عام 1962 م ، تبعتها فأرة الكمبيوتر بعد عامين . في عام 1971 م، اخترع القرص المرن، مما يعني أن المعلومات يمكن أن تكون مشتركة بين أجهزة الكمبيوتر. تم إنتاج أول جهاز كمبيوتر الحاسوب الشخصي عام 1974 م، مما جعل الناس يتمكنون من شراء أجهزة كمبيوتر واستخدامها في المنزل.

In 1983 CE, people could buy a laptop for the first time. Then, in 1990 CE, the British scientist Tim Burners-Lee developed the World Wide Web. It was not until 2007 CE that the first smartphones appeared. Today, most people use their mobile phones every day.

في عام ١٩٨٣ م استطاع الناس ولأول مرة شراء الكمبيوتر المحمول. ثم في عام ١٩٩٠ م طور العالم البريطاني تيم بيرنرز لي الشبكة العنكبوتية. ولم يطرأ أي جديد حتى عام ٢٠٠٧ م الذي شهد ظهور الهواتف الذكية لأول مرة. في يومنا هذا أكثر الناس يستخدمون هواتفهم المحمولة بشكل يومي.

What will happen in the future? You can already buy watches which can do the same as mobile phones. Scientists have also developed glasses that are capable of doing even more than this.

ماذا سيحدث في المستقبل؟ يمكنك شراء ساعات تعمل نفس عمل الهواتف النقالة. وقد طور العلماء أيضا نظارات قادرة على عمل أكثر من ذلك.

Life in the future is going to see further changes in computer technology. It is likely that all aspects of everyday life will rely on a computer program, from how we travel to how our homes are heated.

الحياة في المستقبل ستشهد تغيرات كبيرة في عالم التكنولوجيا. من المحتمل أن كل المفاهيم لحياتنا اليومية سوف تعتمد على برنامج للكمبيوتر من حيث كيف نسافر الى كيف ندفع ببيتنا.

### Using technology in class استخدام التكنولوجيا في الصف

Young people love learning, but they like learning even more if they are presented with information in an interesting and challenging way. Today, I am going to give a talk about how you can use technology in Jordanian classrooms.

الشباب يحبون التعلم، لكنهم يحبون التعلم أكثر إذا قدمت لهم المعلومات بطريقة مثيرة للإهتمام والتحدى. اليوم، سألقي محاضرة حول كيفية استخدام التكنولوجيا في الفصول الدراسية الأردنية.

Here are some ideas: وهنا بعض الأفكار

Many classrooms now use a whiteboard as a computer screen. As a consequence, teachers can show websites on the board in front of the class. Teachers can then use the internet to show educational programmes, play educational games, music, recording of languages, and so on.

العديد من الفصول الدراسية الآن تستخدم السبورة كشاشة كمبيوتر. ونتيجة لذلك، يمكن للمدرسين اظهار المواقع على اللوح في وسط الصف. يمكن للمعلمين بعد ذلك استخدام شبكة الانترنت لعرض البرامج التعليمية، والألعاب التعليمية، والموسيقى، وتسجيل اللغات، وما إلى ذلك.

In some countries, tablet computers are available for students to use in class. Therefore, students can use the tablets to tasks such as showing photographs, researching information, recording interviews, and creating diagrams.

في بعض البلدان، تتوفر أجهزة الكمبيوتر اللوحي للطلاب لإستخدامها في الصف. وبالتالي، يمكن للطلاب استخدامها لمهام مثل عرض الصور المعلومات، وتسجيل المقابلات، وعمل الرسوم البيانية.

## 1- Tablets are ideal for pair and group work.

التابلت يعتبر مثالي للعمل الزوجي والجماعي.

Teachers can perhaps ask their students to start writing a blog (an online diary), either about their own lives or as if they were someone famous. They can also create a website for the classroom. Students can contribute to the website, so for example they can post work, photos and messages.

يمكن للمدرسين ان يطلبوا من طلابهم البدء بكتابة اليوميات علي الإنترنت إما عن حياتهم الخاصة أو كما لو أنهم مشهورين ويمكن أيضا إنشاء موقع على شبكة الإنترنت للصف. يمكن للطلاب المشاركة في الموقع، فعلى سبيل المثال يمكن إرسال الأعمال والصور والرسائل.

Most young people communicate through social media, but which they send each other photos and messages via the internet. Some students like to send messages that are under 140 letters for anyone to read. Teachers can ask students to summarise information about what they have learnt in class in the same way.

معظم الشباب يتواصلون عبر وسائل الإعلام ، ولكنهم يرسلون الصور والرسائل عبر الإنترنت. بعض الطالب يحبون إرسال الرسائل التي هي اقل من 140 حرف الي شخص يقرأها. يمكن للمدرسين مطالبة الطالب بتلخيص المعلومات حول ما تعلموا في الصف بنفس الطريقة.

## 2- If students learn to summerise quickly, they will be able to use this skill in the future.

إذا تعلم الطالب التلخيص بسرعة، سوف يكون باستطاعتهم استخدام هذه المهارة في المستقبل.

We all like to send emails, don't we? Email exchanges are very useful in the classroom. Teachers can ask students to email what they have learnt to students of a similar age at another school.

كلنا نرغب في إرسال رسائل البريد الإلكتروني، اليس كذلك؟ تبادل الإيميلات مفيد جدا في الفصول الدراسية. يمكن للمدرسين مطالبة الطالب إرسال إيميل عما تعلم الى طالب من نفس العمر في مدرسة أخرى.

### 3. They could even email students in another country.

As a result, students can then share information and help each other with tasks.

ويمكن حتى مراسلة طالب في بلد آخر. ونتيجة لذلك، يمكن للطلاب تبادل المعلومات ومساعدة بعضهم البعض في بعض المهام

Another way of communicating with other schools is talking to people over the computer. Most computers have cameras, so you can also see the people you are talking to. In this way, students who are studying English in Jordan can see what students in England are doing in the classroom while they are speaking to them. You can also use this system to invite guest speakers to give talks over a computer.

وهناك طريقة أخرى للتواصل مع مدارس أخرى وهي التحدث إلى الناس عبر الكمبيوتر. معظم أجهزة الكمبيوتر لديها الكاميرات، لذلك يمكنك أن ترى أيضا الناس الذين تتحدث معهم. بهذه الطريقة، يمكن للطلاب الذين يدرسون اللغة الإنجليزية في الأردن ان يروا ماذا يفعل الطلاب في الصف في إنجلترا. يمكنك ايضا استخدام هذا النظام لدعوة المتحدثين الضيوف لإعطاء

### 4. For example, scientists or teachers from another country could give a lesson to the class.

على سبيل المثال فإن العلماء و المعلمين من دولة اخرى يمكن ان يعطوا درسا للصف

If you had this type of lesson, the students would be very excited.

إذا كان لديك هذا النوع من الدروس، فإن الطلاب سوف يكونون في غاية السعادة و الحماس.

Students often use computers at home if they have them. Students can use social media on their computers to help them with their studies, including asking other students to check and compare their work, asking questions and sharing ideas. The teacher must be part of the group, too, to monitor what is happening. Thank you for listening. Does anyone have any questions?

غالبا ما يستخدم الطلاب أجهزة الكمبيوتر في المنزل إذا كان لديهم. يمكن للطلاب استخدام وسائل الإعلام على أجهزة الكمبيوتر الخاصة بهم لمساعدتهم في دراستهم، يتضمن ذلك مطالبة الطلاب الآخرين بالتأكد ومقارنة أعمالهم، طرح الأسئلة وتبادل الأفكار. يجب أن يكون المعلم جزء من المجموعة، أيضا، لمراقبة ما يحدث.

## The Internet of Things انترنت الأشياء

Everyone knows that the internet connects people, but now it does more than that- it connects objects, too. These days, computers often communicate with each other, for example, your TV automatically downloads your favourite TV show, or your 'sat nav' system tells you where you are. This is known as the 'Internet of Things', and there's a lot

الجميع يعرف أن الإنترنت يربط الناس، ولكن الآن انه يفعل اكثر من ذلك. انه يربط الأشياء أيضا. هذه الأيام، أجهزة الكمبيوتر غالبا تتواصل مع بعضها ، على سبيل المثال، التلفزيون تلقائيا يحمل برنامجك التلفزيوني المفضل، أو نظام الملاحة عبر الأقمار الصناعية الذي يخبرك أين أنت. ويعرف هذا باسم "إنترنت الأشياء"، وهناك المزيد في المستقبل.

In just a few years' time, experts say that billions of machines will be connected to each other and to the internet. As a consequence, computers will increasingly run our lives for us. For example, your fridge will know when you need more milk and add it to your online shopping list; your window will close if it is likely to rain; your watch will record your heart rate and email your doctor; and your sofa will tell you when you need to stand up and get some exercise.

في السنوات القليلة القادمة ، يقول الخبراء أنه سيتم ربط المليارات من الآلات بعضها ببعض وبشبكة الإنترنت. ونتيجة لذلك، سيقوم الكمبيوتر بتشغيل حياتنا . على سبيل المثال، ثلاجتك ستعرف متى تحتاج المزيد من الحليب وتضيف ذلك الى قائمة التسوق الخاصة بك على الإنترنت. نافذتك سوف تغلق إذا كان من المحتمل سقوط المطر؛ سوف تسجل ساعتك معدل ضربات القلب وترسلها لطبيبك عبر الإيميل . وأريكتك سوف تخبرك عندما تحتاج للوقوف وعمل بعض التمارين الرياضية.

Many people are excited about the 'Internet of Things'. For them, a dream is coming true. They say that our lives will be easier and more comfortable. However, others are not so sure. They want to keep control of their own lives and their own things. In addition, they wonder what would happen if criminals managed to access their passwords and security settings. The dream could easily become a nightmare!

كثير من الناس متحمسون لـ "إنترنت الأشياء". بالنسبة لهم، الحلم يتحقق . يقولون أن حياتنا ستكون أسهل وأكثر راحة. ومع ذلك، البعض الآخر ليسوا متأكدين من ذلك يريدون التحكم بحياتهم والأشياء الخاصة بهم بالإضافة إلى ذلك، يتساءلون عما سيحدث لو تمكن المجرمين من الوصول إلى كلمات المرور الخاصة بهم وضبط الأمان . الحلم يمكن بسهولة ان يصبح كابوسا!

\* Answer the following questions: أجب عن الأسئلة التالية

1- What does 'The internet of Things' mean? Give an example from the text.

The connections between different computers. e.g.: TV downloads and 'sat nav system

2- Find a word in the first paragraph which has the same meaning as "speak to".

Other people

5- The writer states that the internet connects two things. Mention them.

1- People

2- Objects

6- Quote the sentence which indicates the reason why computers will increasingly run our lives for us.

In just a few years' time, experts say that billions of machines will be connected to each other and to the internet.

7- According to the text, why are some people excited about the future? Why are others worried?

Some people are excited because they think their lives will be made easier and more comfortable. Others are worried because they want to keep control of their own lives and their own things.

## 8- In your opinion, is the 'Internet of Things' exciting or worrying? Why?

I think it is exciting because it makes life easier and more comfortable.  
Also, it will run everything in our life.

## 9- Give some examples about the Internet of Things in the future:

- 1- **Your fridge:** will know when you need more milk and add it to your online shopping list.
- 2- **Your window:** will close if it is likely to rain.
- 3- **Your watch:** will record your heart rate and email your doctor.
- 4- **Your sofa:** will tell you when you need to stand up and get some exercise.

## 10- Many people are excited/satisfied / sure about the Internet of Things. Why? Explain.

They say that our lives will be easier and more comfortable.

## 11- Other people are not excited / not satisfied /not sure about the Internet of Things. Mention two reasons.

- 1- They want to keep control of their own lives and their own things.
- 2- They wonder what would happen if criminals managed to access their passwords and security settings.

## The Advantages and Disadvantages of Online Shopping

### إيجابيات وسلبيات التسوق عبر الإنترنت

Most people now use the internet on computers. Smartphones and tablets to do a variety of tasks. For many people, these tasks include online shopping. From shopping for groceries to all kinds of clothes shopping. Consumers are finding this the easiest way to get what they need, literally at the touch of a button. However, there are numerous and important disadvantages to shopping in this way.

Although using the internet to shop is usually fairly easy, and there is often greater variety available, it is always a risk because you cannot try on or see in details the item up being an inconvenience if the item is faulty or does not fit, or is just not what the customer wanted.

It is true that the prices are better when you shop online, but, while it might be cheaper, there is a distinct disadvantage because you have to wait for the delivery of the purchases. Some people might prefer not to have any personal contact while shopping online, but it can save time in the end since there are always assistants to help with queries you might have during the transaction. In addition to this, there is the issue of internet payment security, however, recently this has improved a lot.

The internet has indeed given us a wider choice as consumers, as well as made some aspects of shopping more pleasant and convenient. However, it is nearly impossible, in my opinion, to forget the disadvantages we experience from time to time, since these can and do influence the way in which we choose to shop.
