

Year 4 Home Learning 22.9.23

Reading

Please read a minimum of four times each week. Please ask your adult to sign your reading record. Your reading record will be checked each week in class!

Spellings: test day is Friday

Learn your spellings ready for next week's test. Every week there will be five new ones.

If you are finding them tricky use different strategies to help you

E.g. rainbow writing, pyramid writing, look cover check, mnemonics, bubble writing and silly sentences.

Any way is fine as long as you learn these words!

Group 1

peace piece which witch scene seen	manager's teacher's children's gardener's officer's	pressure treasure pleasure measure leisure	
---	---	--	--

Group 2

to two fare fair board bored	children teacher garden people person	old hold very because like	
---	---	--	--

Challenge

Due in 27.9.23

This half term we are learning about: The Romans and The Vikings.

Research information about the Romans and create a model about something you have discovered. For example, you may choose to create a Roman shield or Viking warrior. We look forward to seeing your creations and displaying them in the Year 4 corridor and classrooms when they are complete! Be as creative as you like!

If you'd like an extra challenge, write a short piece explaining your model and why you chose it. Impress us with your new knowledge!

This home learning is ongoing over the next two weeks but optional.

REMINDERS

PE days are **Wednesday** and **Friday**. Please ensure that your child has their kit in school on these days. Both sessions will be outdoors; as the weather changes please ensure your child has plain blue joggers/leggings and a plain blue jumper/sweatshirt.

Times Tables

Throughout the year, we will be focusing on learning all of the times tables up to 12x.

Next week we will focus on the 4x tables.

Have a go at some of the challenges and practice activities below.

TRY OUT THESE ACTIVITIES WHILE YOU ARE TRAINING; SOME PEOPLE'S LEARNING STYLES ARE DIFFERENT AND THESE MIGHT HELP YOU CRACK IT!

HOT POTATO!

Grab a bean-bag and some friends. Pass the bean-bag around and call out the times table you are practicing. Anyone who is too slow is eliminated until only the winner is left!

WHOLE OR NOT?

Grab some number cubes and some paper. Chose a random number of cubes (write down how many) and see how many groups of 3 or 4 you can make. Are there any left over? Notice any patterns?

RAP ATTACK!

So you can sing your 2, 5 and 10 times table, how about you try rapping your 3 and 4 times? Maybe you could even make actions to go along with it.

FOOTY FANATICS!

Tired of the same score lines in footy? Change the scoring rules! Every time your team completes a pass, call out the next number from the 3 or 4 times table. If you complete the table you get to add another goal to your score! But beware, so does the other team!

LOOK WHO'S TALKING!

Can you do a funny accent? Now's the time to show it off! Go through the times tables in the strangest accent you can think of. Which of your friends is the funniest?

FOUR ON THE FLOOR!

A chair has four legs; can you use your times table knowledge to work out how many chair-legs are in the room? How about finding out the number of wheels on the cars in the car park?

TAKE YOUR CHANCES, ROLL THE DICE!

Get a ten-sided dice and a training partner. Choose a times table to practice and roll the dice. Whatever it lands on you need to multiply!

FASTER THAN A COMPUTER!

Your partner uses a calculator while you use your mind. Who can get to the answer quickest?
