Professional cleaning solutions

Product catalogue

Pure power

Pure power for cleaning professionals

Sanitec is Italtchimica's line dedicated to professional detergents and cosmetics, where the precision of science meets the excellence of performance.

Every Sanitec product is developed from Italtchimica research and is studied in its laboratories to guarantee maximum performance, safety of use and respect for the environment.

The complete range of solutions covers the needs of the Ho.Re.Ca, industry, facility management, professional laundromats and medical facilities, offering consistent and measurable results in every application.

Areas of application

The Sanitec range consists of specific lines designed for a variety of professional uses. Sanitec meets all the needs of cleaning companies, the Ho.Re.Ca. sector, industry, laundry, care and medical facilities.

Its versatility also extends to the cleaning of swimming pools, to the treatment of monuments of historical and artistic value, to specific skin care ranges.

Kitchen

- Effective, surface-friendly detergents
- Full suitability for H.A.C.C.P. control plans

Floors and other surfaces

- Detergents for difficult surfaces, suitable for all application areas
- Highly concentrated products without the need for PPE at the dosage of use
- Room and fabric fragrances

Laundry

- Super-concentrated formulas: up to 3 times more than standard products
- Ecolabel certified system

Skin care

- Products specifically developed for healthcare applications
- Gentle formulas for effective cleansing and care of all skin types

Stone and metal surfaces

- Removal of sulfation stains and blackened crusts caused by pollution
- A line that preserves the characteristics of the stone, environmentally friendly and safe for the user

Italchimica

Science, technology and industrial reliability

Italchimica, owner of the Sanitec brand, is one of Italy's leading industrial players in the design, formulation and production of highly specialised detergents and cosmetics. With a strictly science-driven approach, it develops professional solutions that improve people's quality of life, with a constant focus on process efficiency and the protection of natural resources and the environment.

The in-house integration of research and development, production and quality control enables Italchimica to guarantee high standards, complete traceability and measurable performance at every stage of the production cycle. The laboratories, equipped with advanced analytical technologies, work according to scientific protocols that ensure stable, effective and safe formulations for the user and the environment.

Thanks to a modern industrial structure in Padua of 30,000 square metres, a logistics hub of over 20,000, 10 production lines and an organisation geared to continuous collaboration with the customer, Italchimica offers quick answers and customised solutions to professionals in the Ho.Re.Ca, industry, facility management, professional laundry and the medical sector.

Our Vision

Italchimica creates innovative and sustainable cleaning and cosmetics products for people's quality of life and the care of the planet.

Our Mission

Italchimica is the landmark industrial operator in Italy in the creation, production and marketing of detergent and cosmetic formulas that contribute to improving people's quality of life, while respecting natural resources, quickly and proactively serving both the professional and consumer markets.

Italchimica's reliable service and organisation in constant dialogue with the customer provides quick answers and anticipates its customers' needs.

Our values

Rapidity

We work with innovative drive, rigour and professionalism to provide quick answers to our customers, partners and the community

Transparency

We transparently communicate our M.O., our formulas and claims, our development goals

Creation

We are curious and open to change, we can create great things.
We are characterised by professionalism, technicality and innovative spirit, to progress and innovate, always and with great adaptability

Sanitec, from the experience of Italchimica

Sanitec was developed from innovative research and an efficient and certified industrial system. It is now a benchmark for cleaning professionals in Italy and in more than 60 countries worldwide. A unique combination of power, technology and reliability.

Research & Development is at the heart of Italchimica, owner of the Sanitec brand, an integrated system where chemistry, technology, marketing and sustainability work in synergy to generate high-performance solutions for professional detergents and cosmetics. Each project stems from listening to the market and analysing the real needs of professionals and end users, transforming operational requirements into rigorous formulation protocols.

A scientific method geared towards the care of natural resources

Italchimica's R&D approach focuses on the environment and natural resources. Research activities are guided by criteria of responsibility and traceability, favouring renewable and biodegradable raw materials, ingredients that are locally available as much as possible, and solutions formulated to reduce environmental impact throughout the product life cycle.

From feasibility studies to the choice of raw materials, from benchmark analyses to continuous formulation updates, every step responds to a clear principle: to develop effective, safe and sustainable products with scientifically verified claims.

Qualified teams in various scientific and technical disciplines carry out the following activities:

- **New business development**
- **Current business**
- **Quality control**
- **Regulatory**

Numbers

that prove the efficiency of the research

Italchimica's R&D structure operates with an advanced industrial model, supported by laboratories equipped with advanced analytical technologies. Key data on scientific activity:

50K

Laboratory tests performed each year

400

Active and continuously developing formulations

40

PMC products

Italian certification for disinfectant products

57

Ecolabel products

Certifications

Italchimica's products for home and personal care, as well as for the hygiene and disinfection of professional and domestic spaces, from the *hôtellerie* to health and medical facilities and catering, are certified and comply with safety standards.

Italchimica's priority is to ensure regulatory compliance and maintain high quality standards over time, through strict controls and continuous verification of claims.

Product certifications

Italian certification for disinfectant products

System certifications

Management system for Gender Equality

Sustainability as an industrial choice

Green Change Matters is Italcimica's sustainability journey based on measurable data, scientific accountability and continuous improvement. A concrete approach that integrates sustainability, innovation and performance, transforming chemistry into a driver of value for people, the environment and the markets that the company operates in.

Every year, Italcimica reports its results through the Sustainability Report, based on an ISO 14064-certified system for measuring emissions and environmental impacts. A process that ensures transparency, reliability and constant monitoring of progress to support increasingly informed industrial decisions.

Using the QR code, you can access the latest sustainability report and the leaflet that highlights the most important aspects, in addition to the archive of previous reports.

Water resources

We favour concentrated formulas, optimise water management to limit packaging and transport impacts

Raw materials

We select easily biodegradable materials to help protect the environment

ISO 14064 certification
For the measurement of greenhouse gas emissions

Measuring to improve

As part of its ESG journey, Italcimica has obtained ISO 14064-1:2018 certification, the international standard that defines criteria for quantifying, monitoring and reporting greenhouse gas (GHG) emissions consistent with UN climate frameworks.

The adoption of this system allows the company to have a structured and verified inventory of its carbon footprint, accurately identifying the main emission sources along the entire value chain, including direct and indirect emissions related to energy, transport and raw materials.

The certification represents an operational environmental management tool: the data collected directs concrete and measurable improvement plans, which include logistics and intermodal optimisation, palletisation efficiency, the development of recyclable packaging and waste recovery systems, the reuse of industrial water and the increase of formulations with biodegradable surfactants.

This system is based on globally recognised metrics, allowing Italcimica to monitor its environmental performance over time and integrate sustainability into its production processes in a structured and continuous manner.

Packaging

We favour the selection of recycled, recovered and process-recyclable components

Waste

We are committed to identifying opportunities to generate value at the end-of-life of materials through their recovery and recycling

Emissions

We invest in clean energy with a CO₂ reduction and offsetting plan

Energy resources

We self-generate energy from renewable sources through investment in new technologies

Kitchen

Quality products for cleaning and hygiene in professional kitchens

Cleanliness and hygiene in professional kitchens are essential to ensure food and drink safety for customers. Washing, storage and cooking areas must be cleaned with quality products and in accordance with specific hygiene procedures that ensure safe food handling.

From dishwashing to surface cleaning and disinfection, Sanitec offers high-performance solutions to facilitate daily cleaning tasks in professional kitchens. Specific formulations have been developed to remove all types of dirt and preserve the different surfaces in the kitchen.

THE STEPS IN THE MECHANICAL DISHWASHING PROCESS

PHASE 1

SOAKING

Soaking has the function of **removing the most stubborn dirt** before the dishes enter the dishwasher

PHASE 2

WASHING

The main wash cycle **attacks, dissolves and holds the dirt** from the dishes in suspension.

It is important at this stage to have the correct level of alkalinity to allow the product to act more effectively, saponifying oils and fats to make them water-soluble

PHASE 3

RINSING

The purpose of rinsing is **to remove cleaning solution residues and the dirt particles** in suspension

Adding rinse aid helps the dishes dry better, reducing the surface tension of the water and preventing limescale deposits on dishes and the machine

STOVIL GREEN POWER

Alkaline liquid detergent concentrate **Ecolabel-certified**, for mechanical dishwashing, for all water hardnesses

- EU Ecolabel-certified product with low environmental impact
- Effectively removes encrusted grease and food residues
- Prevents limescale build-up on dishes
- Excellent rinsability

Directions: To be used with Sanitec automatic dispensers, or in combination with dosing systems integrated into the machine when present.

Dosage: Adjust the dispenser to 1-3,5 ml/L depending on the degree of dirt and water hardness. The recommended dosage refers to the use of the product under optimal conditions. Consult Sanitec Service technical support for dosage adjustment.

STOVIL ULTRA

Concentrated alkaline liquid detergent for mechanical dishwashing, for hard water from 25°F a 50°F

- Effectively removes encrusted grease and food residues
- Prevents limescale build-up on dishes
- Excellent rinsability

Directions: To be used with Sanitec automatic dispensers, or in combination with dosing systems integrated into the machine when present.

Dosage: Adjust the dispenser to 1-2 ml/L depending on the degree of dirt and water hardness. The recommended dosage refers to the use of the product under optimal conditions. Consult Sanitec Service technical support for dosage adjustment.

STOVIL POWER

Concentrated alkaline liquid detergent for mechanical dishwashing, for medium waters between 15°F and 25°F

- Effectively removes encrusted grease and food residues
- Prevents limescale build-up on dishes
- Excellent rinsability

Directions: To be used with Sanitec automatic dispensers, or in combination with dosing systems integrated into the machine when present.

Dosage: Adjust the dispenser to 1-3 ml/L depending on the degree of dirt and water hardness. The recommended dosage refers to the use of the product under optimal conditions. Consult Sanitec Service technical support for dosage adjustment.

MECHANICAL DISHWASHING

STOVIL ACTIVE

Concentrated alkaline liquid detergent for mechanical dishwashing, for soft water below 15°f

- Effectively removes encrusted grease and food residues
- Prevents limescale build-up in the dishwasher
- Excellent rinsability

Directions: To be used with Sanitec automatic dispensers, or in combination with dosing systems integrated into the machine when present.

Dosage: Adjust the dispenser to 3-5 ml/L depending on the degree of dirt and water hardness. The recommended dosage refers to the use of the product under optimal conditions. Consult Sanitec Service technical support for dosage adjustment.

STOVIL OSMOS

Concentrated alkaline liquid detergent for mechanical dishwashing, specifically for osmosis water

- Effectively removes encrusted grease and food residues
- Prevents limescale build-up on dishes
- Excellent rinsability thanks to the controlled foam formulation

Directions: To be used with Sanitec automatic dispensers, or in combination with dosing systems integrated into the machine when present.

Dosage: Adjust the dispenser to 1-3 ml/L depending on the degree of dirt and water hardness. The recommended dosage refers to the use of the product under optimal conditions. Consult Sanitec Service technical support for dosage adjustment.

STOVIL CHLOR

Product pending registration as **Biocide**

Alkaline chlorinated liquid detergent for mechanical dishwashing, for all water hardnesses

- Whitening action
- Effectively removes grease and oxidizable stains such as coffee, tea and lipstick
- Removes odours
- Excellent rinsability

Directions: To be used with Sanitec automatic dispensers, or in combination with dosing systems integrated into the machine when present.

Dosage: Adjust the dispenser to 2-4 ml/L depending on the degree of dirt and water hardness. The recommended dosage refers to the use of the product under optimal conditions. Consult Sanitec Service technical support for dosage adjustment.

STOVIL BAR

Concentrated alkaline liquid detergent for cups, mugs, glasses, cutlery and small dishes in general, for all water hardnesses

- Effectively removes coffee, tea and lipstick stains
- Effectively removes encrusted grease and food residues
- Prevents limescale build-up on dishes
- Excellent rinsability

Directions: Ideal for cup washers, glass washers and small undercounter dishwashers. To be used with Sanitec automatic dispensers, or in combination with dosing systems integrated into the machine when present.

Dosage: Adjust the dispenser to 1-2 ml/L depending on the degree of dirt and water hardness. The recommended dosage refers to the use of the product under optimal conditions. Consult Sanitec Service technical support for dosage adjustment.

STOVIL FAST

Dual action alkaline liquid detergent:

- 1) Mechanical washing of delicate materials such as aluminium, light alloys, etc.
- 2) Dish soaking function, for all water hardness levels

- Effectively removes encrusted grease and food residues
- Prevents limescale build-up on dishes
- Excellent rinsability thanks to the formulation with controlled foam surfactants

Directions: To be used for soaking dishes when the dirt is significant. Mechanical washing: the product is normally dosed using Sanitec automatic dosing equipment, or in combination with dosing systems integrated into the machine when present.

Dosage: Adjust the dispenser from 3 to 5 ml/L depending on the degree of dirt and water hardness. Soaking: dilute the product in hot water at a rate of 5 to 10 ml/L (0,5-1 capful every 5 litres) depending on the degree of dirt. Immerse the dishes in the solution for 10-15 minutes. For stubborn dirt, leave the dishes to soak for longer. Then continue with normal washing.

STOVIL TABS

Dishwasher detergent tablets for mechanical dishwashing, for all water hardnesses

Six actions with one tablet:

1. Optimal dirt removal
2. Anti-limescale and anti-stain action
3. Rinse aid action
4. Oxidizing action with active oxygen
5. Lemon-scented odour remover
6. Active protection of dishes and glasses

Directions: Dishwashers without a tray: unwrap the tablet and place it in the appropriate tray. Professional dishwashers: place the tablet directly into the wash tub. Each tablet lasts 5-8 cycles.

MECHANICAL DISHWASHING

STOVIL GEL

Rinse-aid detergent for mechanical dishwashing, for all water hardnesses

- Effectively removes encrusted grease and food residues
- Prevents limescale build-up on dishes
- Excellent rinsability thanks to the formulation with controlled foam surfactants

Directions: Professional dishwashers: the product is dosed using Sanitec automatic dosing equipment, or in combination with dosing systems integrated into the machine, where present.

Dosage: Adjust the dispenser to 2-4 ml/L depending on the degree of dirt and water hardness. Domestic dishwashers: pour the product into the appropriate detergent compartment (1 dose = 25 ml).

BRILL GREEN POWER

Rinse aid, **Ecolabel-certified**, for mechanical dishwashing, for all water hardnesses

- EU Ecolabel-certified product with low environmental impact
- Speeds up the drying of dishes, also effective on plastic
- Eliminates bad odours
- Reduces limescale build-up on dishes

Directions: To be used with Sanitec automatic dispensers, or in combination with dosing systems integrated into the machine when present.

Dosage: Adjust the dispenser to 1-2 ml/L depending on the degree of dirt and water hardness. The recommended dosage refers to the use of the product under optimal conditions. Consult Sanitec Service technical support for dosage adjustment.

BRILL ULTRA

Concentrated acid rinse aid for mechanical dishwashing, for hard water over 25°f

- Speeds up the drying of dishes, also effective on plastic
- Leaves dishes sparkling clean without streaks and water stains
- Eliminates bad odours
- Prevents the formation of scale in the dishwasher
- Excellent rinsability thanks to the formulation with controlled foam surfactants

Directions: The product is dosed using Sanitec automatic dosing equipment, or in combination with dosing systems integrated into the machine when present.

Dosage: Adjust the dispenser to 0,2-0,5 ml/L depending on the degree of dirt and water hardness. The recommended dosage refers to the use of the product under optimal conditions. Consult Sanitec Service technical support for dosage adjustment.

BRILL POWER

Concentrated acid rinse aid for mechanical dishwashing, for medium and soft water up to 25°C

- Speeds up the drying of dishes, also effective on plastic
- Leaves dishes sparkling clean without streaks and water stains
- Neutralizes caustic residues that ruin glass
- Eliminates bad odours
- Prevents the formation of scale in the dishwasher
- Excellent rinsability thanks to the formulation with controlled foam surfactants

Directions: The product is dosed using Sanitec automatic dosing equipment, or in combination with dosing systems integrated into the machine when present.

Dosage: Adjust the dispenser to 0,2-0,5 ml/L depending on the degree of dirt and water hardness. The recommended dosage refers to the use of the product under optimal conditions. Consult Sanitec Service technical support for dosage adjustment.

The modular Trilogy system

The Trilogy range consists of concentrated formulas of detergent, sequestering agent and rinse aid, the concentration of which is dosed by the control unit according to water hardness and level of dirt. The DBrain control unit allows independent dosing of the three products, controlling their concentration in real time, and monitoring their consumption and costs.

**Less product
consumption**
compared to
conventional products
thanks to **up to 4 times
higher concentration**

**Control of running
cost**

Advantages of the Trilogy system:

- Effective in any wash water condition
- No phosphorous derivatives, EDTA and NTA
- Reliable dosages
- Monitoring and statistical processing of washings

TRILOGY CONCENTRATED SYSTEM

TRILOGY WASH T1

Super concentrated alkaline detergent for mechanical dishwashing, for all water hardnesses

- Effectively removes encrusted grease and food residues
- Ensures excellent costs in use thanks to the super-concentrated formula

Directions: For use exclusively in professional machines, we recommend using automatic dispensers. Insert the draw tube directly into the tank. Adjust dosage as needed.

Dosage: Adjust the dispenser to 0,8-1,2 ml/L depending on the degree of dirt and water hardness. The recommended dosage refers to the use of the product under optimal conditions. Consult Sanitec Service technical support for dosage adjustment.

Product to be used in combination with **Trilogy Boost T2** and **Trilogy Rinse T3**

Code	4012	Pcs x Box	2
EAN	8032680399985	Box x Lyr	18
Volume	5 L / 7,5 kg	Box x Plt	72

TRILOGY BOOST T2

Super concentrated vegetable-based sequestering detergent for mechanical dishwashing, for all water hardnesses

- Promotes the removal of dirt and stains
- Prevents the formation of limescale during the washing phase on the dishes and in the dishwasher
- Ensures excellent costs in use thanks to the super-concentrated formula

Directions: For use exclusively in professional machines, we recommend using automatic dispensers. Insert the draw tube directly into the tank. Adjust dosage as needed.

Dosage: Adjust the dispenser to 0,8-1,2 ml/L depending on the degree of dirt and water hardness. The recommended dosage refers to the use of the product under optimal conditions. Consult Sanitec Service technical support for dosage adjustment.

Product to be used in combination with **Trilogy Wash T1** and **Trilogy Rinse T3**

TRILOGY RINSE T3

Super concentrated acid rinse aid for mechanical dishwashing, for all water hardnesses

- Leaves dishes sparkling clean without streaks and water stains
- Excellent rinsability thanks to the formulation with controlled foam surfactants
- Ensures excellent costs in use thanks to the super-concentrated formula

Directions: For use exclusively in professional machines, we recommend using automatic dispensers. Insert the draw tube directly into the tank. Adjust dosage as needed.

Dosage: Adjust the dispenser to 0,1-0,2 ml/L depending on the degree of dirt and water hardness. The recommended dosage refers to the use of the product under optimal conditions. Consult Sanitec Service technical support for dosage adjustment.

Product to be used in combination with **Trilogy Wash T1** and **Trilogy Boost T2**

DEKAL GREEN POWER

Ecolabel-certified acid descaler for removing limescale from tools, machines and equipment

- EU Ecolabel-certified product with low environmental impact
- When used regularly, it helps maintain the performance of the equipment and increases longevity
- Excellent for recirculating washing also due to its low foaming
- Safe on metals and all types of machinery

Directions: Small surfaces/stubborn dirt: apply the product as is directly to the surface to be cleaned, leave to act for a few minutes and then rub with a clean, damp cloth. Rinse thoroughly with water. Soaking: dilute the product at a concentration of 30 ml per litre of hot water (3 caps every 5 litres) depending on the extent of the encrustation. Leave to soak until the limescale deposit has dissolved. If necessary, use a sponge or brush to remove more stubborn limescale deposits. Rinse thoroughly with water. Spray Method: spray on the surface or equipment to be treated. Leave on and rub. Rinse thoroughly with water. Dishwasher/Washing Machine: make sure the machine is completely empty. Pour the product directly into the tray, 30 ml for every litre of water (3 caps for every 5 litres). Run an empty wash cycle at 50-60°C.

DEKAL

Concentrated acid descaler for removing limescale from utensils, machines and equipment such as dishwashers, boilers and pasta cookers.

- Effectively removes greasy dirt and limescale deposits
- When used regularly, it keeps the performance of the equipment unchanged and increases its longevity
- Excellent rinsability thanks to the formulation with controlled foam surfactants
- Safe on metals and all types of machinery

Directions: Soaking: Dilute the product at a concentration of 50 - 150 ml per litre of hot water (5 - 15 caps every 5 litres) depending on the extent of the scale. Leave to soak until the limescale deposit has dissolved. If necessary, use a sponge or brush to remove more stubborn limescale deposits. Rinse thoroughly with water. Spray Method: Spray a solution of 150 ml (15 caps per 5 litres) per litre of water on the surface or equipment to be treated. Leave on and rub. Rinse thoroughly with water. Dishwasher/Washing Machine: Make sure the machine is completely empty. Pour the product directly into the tray, 50 - 150 ml for every litre of water (5-15 caps for every 5 litres). Run an empty wash cycle at 50-60°C.

5L CAN DISPENSER

Dispensing pump

- Precise, fast and safe
- Ensures hygiene and practicality

Manual dispenser	Code	I2388
	EAN	-
	Volume	-

Universal bactericidal and yeasticidal degreaser according to **Italian Ministry of Health**, Registration no. 20440.

- Eliminates 99,9% of bacteria and fungi
- Ideal in all cases where cleaning and disinfection are required in a single operation
- Disinfects and degreases all surfaces in the kitchen, bathroom, offices, and other public environments, cars and waste collection containers, even in the presence of stubborn dirt
- Also recommended for the agri-food and healthcare sectors, on food contact surfaces, and for those in contact with elderly people and children

Directions: For normal cleaning, spray directly to the surface to be treated and then dry with a cloth or paper. To disinfect, spray and leave on for at least 15 minutes, then dry with a cloth, paper or rinse.

Dosage: See the terms of use in the table.

MULTI ACTIV | Unscented

Ready-to-use disinfectant for surfaces according to **Italian Ministry of Health**, Registration no. 20058.

- Eliminates 99,9% of bacteria, fungi and viruses
- Cleans and eliminates bad odours
- Effectively removes gram-positive and gram-negative bacteria, fungi, moulds, and both enveloped and non-enveloped viruses from smooth surfaces, thanks to its formulation with active ingredients
- Suitable for disinfecting kitchens, bathrooms and all surfaces in contact with food

Directions: For normal cleaning, apply directly to the surface to be treated and then dry with a cloth or paper. For disinfection, leave on for at least 5 minutes to obtain bactericidal action or for at least 15 minutes to also obtain fungicidal and virucidal action. For virucidal action, apply the product to the previously cleaned surface. When disinfecting surfaces that may come into direct contact with food, rinse with potable water.

SANIMED | Unscented

Concentrated disinfectant for surfaces according to **Italian Ministry of Health**, Registration no. 20047

- Eliminates 99,9% of bacteria, fungi and viruses
- Fungicidal, bactericidal and virucidal action, active against gram-positive and gram-negative bacteria, fungi, moulds and viruses, both enveloped and non-enveloped, present in domestic and professional environments
- Particularly suitable for disinfecting surfaces and equipment in the agri-food, hotel and catering industries
- It is also suitable for use in high traffic environments, such as bathrooms in public places, outpatient clinics and hospital environments

Directions: Dilute SANIMED® in water and spray or spread with a sponge or mop. For small utensils, immerse the material to be disinfected. When disinfecting surfaces that may come into direct contact with food, rinse with potable water. For virucidal action, apply the product to the previously cleaned surface, in a 5% solution equal to 250 ml per 5 litres of water.

Dosage: For normal cleaning dilute SANIMED® at 0,5%, equal to 25 ml per 5 litres of water. For disinfection, dilute SANIMED® at 1,5%, equal to 75 ml per 5 litres of water and leave to act for at least 5 minutes for bactericidal activity or at least 15 minutes for fungicidal and virucidal activity.

DEGREASERS AND SURFACE CLEANERS

FORNONET

Super concentrated alkaline foaming detergent for ovens, grills and hobs

- Quickly removes caked-on grease, oil and charred food grime
- It forms a compact foam that adheres to vertical walls for greater effectiveness even in the most difficult to reach areas

Code 1960-S* | **Directions:** Make sure the surface to be treated does not exceed 80°C (ideal 50°C - 60°C). Apply the product as is to the surfaces and leave on for a few moments. Remove any residue with an abrasive sponge or brush. Rinse thoroughly with water.

Code 1961 | **Directions:** **Cleaning ovens, grills and hotplates:** make sure that the surface to be treated does not exceed 80°C (ideal 50°C - 60°C). Apply the product as is to the surfaces and leave on for a few moments. Remove any residue with an abrasive sponge or brush. Rinse thoroughly with water. **Cleaning deep fryers:** drain the oil and close the valve. Fill the tub with water until it reaches the oil level. For each litre of water add 50 - 100 ml of product (5 - 10 caps every 5 litres). Turn on the fryer and bring the solution to a boil, without exceeding 100°C. After cooling and emptying, remove any residue with an abrasive sponge or brush. Rinse thoroughly with water. **Cleaning the hood:** prepare a solution with 50 - 100 ml of product for each litre of water. Use warm water for greater effectiveness. Soak the previously dismantled hood pieces for 5-30 minutes. Rinse thoroughly with water.

A solution for every type of surface

Sanitec floor cleaners are formulated to meet the needs of different surface types, ensuring effective cleaning without compromising the materials. Thanks to specific solutions for the degree of porosity, finish and sensitivity of the substrate, Sanitec cleaners ensure a high cleaning performance even on the most stubborn dirt, while at the same time facilitating surface care and protection.

The cleaning action is balanced to respect treatments (e.g. waxes, protective films) and reduce the risk of dulling or streaking, improving the appearance of the floor, wash after wash. The result is a cleaner, safer and more enhanced environment with products designed for everyday and professional use.

DEO SURFACE

Multi-surface cleaner for floors and other hard surfaces, with odour-eliminating technology

- Cleans thoroughly
- Persistent fragrance up to **24h**
- Leaves surfaces shining, without streaks

Directions: Dilute the product in water according to the directions. Apply the product diluted with a cloth, mop or scrubber. No rinsing required.

Dosage:

Mop/scrubber cleaning:

For routine cleaning dilute the product to 1% (10 ml/L)

For a medium degree of soiling dilute the product to 2% (20 ml/L)

For stubborn soiling and for extra fragrance dilute the product to 3% (30 ml/L)

Cleaning with spray:

For routine cleaning dilute the product to 1% (10 ml/L)

For a medium degree of soiling dilute the product to 2% (20 ml/L)

Dosing cap capacity: 50 ml (without safety seal). Apply the product diluted with a cloth, mop or scrubber. No rinsing required. Add a capful of detergent for an even more intense fragrance.

DETERGENTS

ACTIVE CHLOR

Product pending registration as **Biocide**

Concentrated liquid detergent based on non-foaming sodium hypochlorite for hard surfaces

- Cleans, deodorizes and removes stains in a single solution
- Effectively removes stubborn dirt
- Eliminates unpleasant odours
- Easy rinsing thanks to its non-foaming formula

Directions: Ideal for places open to the public such as hospitals, schools, hotels, changing rooms, toilets and in the agri-food sector. Ideal for both manual washing with mop and rag, and for washing with scrubbers, with a lance or in recirculation systems.

Dilute the product in water according to directions, distribute it on the surfaces to be treated with a cloth, mop or scrubber. No rinsing required.

Dosage: 20-40 ml/L (2-4 caps every 5 litres) depending on the degree of soiling.

Code	1173	Pcs x Box	2

ACTIVE CHLOR TABLET

Active chlorine tablet sanitiser for cleaning washable surfaces and treating fruit and vegetable washing water

- Cleans, deodorizes and removes stains in a single solution
- Can be used to treat fruit and vegetable washing solutions
- Practical tablet format, easy to dose and avoids waste
- Each tablet releases 1500 ppm of active chlorine in one litre

Directions: As a surface cleaner: Dilute the product according to the recommended doses and apply it with a sponge, cloth or mop, then rinse with plenty of water. Treatment of aqueous solution for washing fruit and vegetables: Dilute the product according to the recommended doses, immerse fruit, vegetables and greens in the washing solution for 2-3 minutes, then rinse thoroughly with water.

Dosage: Surface cleaner: 2 tablets every 5 litres. Treatment of aqueous solution for washing fruit and vegetables: 1 tablet every 3 litres.

SANIMED | Unscented

Concentrated disinfectant for surfaces according to **Italian Ministry of Health**,
Registration no. 20047

- Eliminates 99,9% of bacteria, fungi and viruses
- Fungicidal, bactericidal and virucidal action, active against gram-positive and gram-negative bacteria, fungi, moulds and viruses, both enveloped and non-enveloped, present in domestic and professional environments
- Particularly suitable for disinfecting surfaces and equipment in the agri-food, hotel and catering industries
- It is also suitable for use in high traffic environments, such as bathrooms in public places, outpatient clinics and hospital environments

Directions: Dilute SANIMED® in water and spray or spread with a sponge or mop. For small utensils, immerse the material to be disinfected. When disinfecting surfaces that may come into direct contact with food, rinse with potable water. For virucidal action, apply the product to the previously cleaned surface, in a 5% solution equal to 250 ml per 5 litres of water.

Dosage: For normal cleaning dilute SANIMED® at 0,5%, equal to 25 ml per 5 litres of water. For disinfection, dilute SANIMED® at 1,5%, equal to 75 ml per 5 litres of water and leave to act for at least 5 minutes for bactericidal activity or at least 15 minutes for fungicidal and virucidal activity.

MULTI ACTIV | Pine

Ready-to-use disinfectant for surfaces according to **Italian Ministry of Health**, Registration no. 20058.

- Eliminates 99,9% of bacteria, fungi and viruses
- Cleans and eliminates bad odours
- Effectively removes gram-positive and gram-negative bacteria, fungi, moulds, and both enveloped and non-enveloped viruses from smooth surfaces, thanks to its formulation with active ingredients
- Suitable for disinfecting kitchens, bathrooms and all surfaces in contact with food

Directions: For normal cleaning, apply directly to the surface to be treated and then dry with a cloth or paper. For disinfection, leave on for at least 5 minutes to obtain bactericidal action or for at least 15 minutes to also obtain fungicidal and virucidal action. For virucidal action, apply the product to the previously cleaned surface. When disinfecting surfaces that may come into direct contact with food, rinse with potable water.

Dosage: See the terms of use in the table.

MULTI ACTIV | Unscented

Ready-to-use disinfectant for surfaces according to **Italian Ministry of Health**, Registration no. 20058.

- Eliminates 99,9% of bacteria, fungi and viruses
- Cleans and eliminates bad odours
- Effectively removes gram-positive and gram-negative bacteria, fungi, moulds, and both enveloped and non-enveloped viruses from smooth surfaces, thanks to its formulation with active ingredients
- Suitable for disinfecting kitchens, bathrooms and all surfaces in contact with food

Directions: For normal cleaning, apply directly to the surface to be treated and then dry with a cloth or paper. For disinfection, leave on for at least 5 minutes to obtain bactericidal action or for at least 15 minutes to also obtain fungicidal and virucidal action. For virucidal action, apply the product to the previously cleaned surface. When disinfecting surfaces that may come into direct contact with food, rinse with potable water.

Dosage: See the terms of use in the table.

Dosy Cabinet

Dosy Cabinet is a practical wall-mounted dispensing system for concentrated detergents that makes it easy and safe to obtain a product diluted to the correct concentration for use.

The system is versatile and allows the concentrated product to be dosed directly into the bottle or bucket, avoiding overdosing of products and facilitating use in different applications.

One pack of Dosy concentrates is equivalent to 300 bottles of diluted product

$$6 \text{ pcs } \times \text{ (1000 ML bottle) } = 300 \text{ pcs } \times \text{ (500 ML spray bottle) }$$

Advantages of the Dosy system:

- Optimisation of detergent storage space
- Reduction of transport and disposal costs
- Maximum safety of use during the dilution phase

HC4 SURFACE | Floral fresh

Ultra-concentrated floor cleaner

- Effectively degreases and removes dirt from all washable surfaces, even delicate ones such as marble
- Does not require rinsing and leaves no streaks
- Leaves a pleasant fragrance
- The product at the concentration of use has no CLP hazard statement
- One litre of concentrate yields 50 5L buckets of ready-to-use product

Directions: Dilute the product in water according to directions, distribute it on the surfaces to be treated with a cloth, mop or scrubber. No rinsing required.

Dosage: 20 ml (one dose with dispenser or measuring cap) in 5 litres of water.

pH
9.5 - 10.5

Code	1706	Pcs x Box	6

HC10 BAKTERIO | Fragrance-free

Disinfectant according to Italian Ministry of Health, Registration no. 15446, for environmental use with bactericidal, fungicidal and virus (virus with envelope) activity.

- Eliminates 99.9% of bacteria, fungi and viruses
- Eliminates bad odours
- Does not corrode metals, does not stain surfaces
- The product at the concentration of use has no CLP hazard statement
- One litre of concentrate yields 50 5L buckets of ready-to-use product

Directions: BAKTERIO® should be used diluted to disinfect, cleanse and deodorise by applying the solution with a mop, cloth or sponge.

Dosage: For routine cleaning dilute the product in 1 to 3% water and leave for 5 minutes. To disinfect and vigorously deodorise, dilute in water at a ratio of 20% and leave on for at least 5 minutes for bactericidal activity or at least 15 minutes for fungicidal and virucidal activity (viruses with envelope). For virucidal action, apply the product to the previously cleaned surface.

Air fresheners

The new professional odour neutralising detergents and air fresheners line

Thanks to innovative odour-eliminating technology and long-lasting fragrance - up to 48 hours in some formulations - the DEO line of professional odour neutralising detergents and air fresheners guarantee impeccable cleanliness and an olfactory experience that creates welcoming environments with a strong, recognisable and distinctive sensory identity.

Ideal for accommodations, restaurants, offices and business centres, DEO products transform the perception of spaces thanks to sophisticated fragrances that interpret the latest trends in the fragrance world, created in collaboration with prestigious *perfume houses*.

- **DEO SURFACE Multi-surface odour neutralising detergents** for floors and hard surfaces, with long-lasting fragrance, up to 24h
- **DEO FRESH air fresheners** for rooms with a persistent fragrance for up to 48h
- **DEO SPRAY air fresheners** for both rooms and fabrics, with fragrance lasting up to 48h

DEO SURFACE

Multi-surface cleaner for floors and other hard surfaces, with odour-eliminating technology

- Cleans thoroughly
- Persistent fragrance up to **24h**
- Leaves surfaces shiny, without streaks

Directions: Dilute the product in water according to the directions. Apply the product diluted with a cloth, mop or scrubber. No rinsing required.

Dosage:

Mop/scrubber cleaning:

For routine cleaning dilute the product to 1% (10 ml/L)

For a medium degree of soiling dilute the product to 2% (20 ml/L)

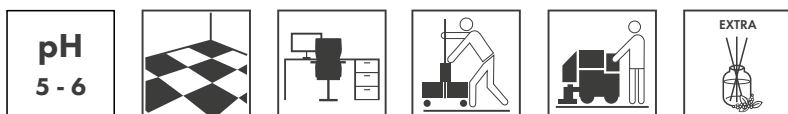

For stubborn soiling and for extra fragrance dilute the product to 3% (30 ml/L)

Cleaning with spray:

For routine cleaning dilute the product to 1% (10 ml/L)

For a medium degree of soiling dilute the product to 2% (20 ml/L)

Dosing cap capacity: 50 ml (without safety seal). Apply the product diluted with a cloth, mop or scrubber. No rinsing required. Add a capful of detergent for an even more intense fragrance.

Laundry

Laundry

Cleaning fabrics in a professional environment is a key aspect to ensure the safety and comfort of customers. An efficient wash is one that not only effectively removes dirt, but also preserves the softness and integrity of fabrics over time. Type and colour of fabrics, water hardness conditions and the presence of heavy metals are some of the parameters that must be considered when selecting the optimal products and washing process.

Sanitec offers a wide range of detergents and pre-treatments for professional textile washing, with formulas carefully designed for various washing conditions

PROCAPS TECHNOLOGY

Sanitec fabric softeners, thanks to Procaps technology, encapsulated fragrances with prolonged release, guarantee a long-lasting, persistent fragrance on damp and dry clothes.

PHASE 1

PRE-TREATMENT

Pretreatment is used in **conditions of particular dirt and difficult removal**.

The product is **applied directly to the stain** before putting it in the machine

PHASE 2

PREWASH

Prewash is used on **stubborn dirt conditions**.

The purpose of this phase is **to help separate fabric fibres and remove sticky substances**, to avoid them from setting in the subsequent stages.

Pre-washing white clothes can also be done with a chlorine-based product

< 40° C

4 - 8 min

PHASE 3

WASHING

The main wash has the task of **attacking, dissolving and suspending dirt** found on the fibres.

At this stage it is important to work with the correct level of **alkalinity to promote complete separation of the fibres** and allow the product and water to act more deeply, saponifying oils and greases and making them soluble in water

30 - 90 °C

12 - 18 min

PHASE 4

RINSING

Rinsing **removes any dirt still present and traces of detergent** from the fabrics. Usually at least 3 rinses are programmed.

In the final rinse the **acidification process** is carried out, which neutralizes the effect of the detergent by bringing the pH to neutral values.

This can be achieved **through a neutralizer or fabric softener**

Cold

3 cycles x 3 min

Quantum concentrated system

Sanitec Quantum is the **concentrated liquid product line** developed for the automatic washing of textiles in the professional sector. The comprehensive range of detergents, softeners and additives combines excellent performance with reduced environmental impact.

Within the Quantum line, an **Ecolabel system [EU ECOLABEL IT/039/009 Laundry Detergents for Industrial and Professional Use]** has been certified to meet the highest verified environmental requirements.

Thanks to the synergy between surfactants and enzymatic components, the system is designed to guarantee excellent results even at low temperatures so as to reduce costs and time associated with washing, preserve textiles for longer and contribute to the reduction of CO₂ emissions.

Advantages of the Quantum system:

Reduction of storage space
and transport and disposal
costs

Products without
EDTA and NTA

Reduced weight to be
handled by the operator

SOLUTIONS FOR THE WASHING & MOP/FRINGE PRE-SOAKING FOR CLEANING COMPANIES

ProActive System technology

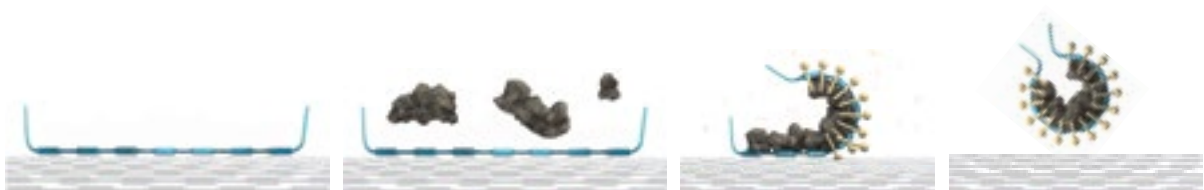

Quantum Surf and Quantum Booster were developed with the **ProActive System technology** which protects fabrics by facilitating the removal of dirt molecules and preventing redepositing during the washing phases.

Helps remove dirt from the very first use

Continuous use facilitates removal and prevents redeposition

QUANTUM BASIC

Concentrated alkaline sequestrant detergent

- Quantum System **Ecolabel-certified**, environmentally friendly
- Effectively removes dirt by increasing the alkalinity of the wash bath
- Avoids the redeposition of removed dirt on fibres due to formula with anti-redeposition agents
- Prevents greying of fabrics
- Suitable for delicate, coloured clothes and microfibre mops and cloths

Directions: For use with L-Brain Connect automatic dosing systems only. It must be used during the pre-wash or wash phase. For optimum results, we recommend using Quantum system products. Do not use on wool and delicates.

Dosage: 0,5-4 ml/kg of dry laundry. The recommended dosage refers to the use of the product under optimal conditions. Consult Sanitec Service technical support for dosage adjustment.

LAUNDRY BASIC

Alkaline sequestering fabric detergent

- Removes dirt by increasing the alkalinity of the wash bath
- Contains anti-redeposition agents that prevent redeposition of the removed dirt onto the fibres during washing
- Prevents greying of fabrics
- Non-foaming
- For use in combination with Laundry Surf

Directions: For use with L-Brain Connect automatic dosing systems only. It must be used during the pre-wash or wash phase.

Dosage: 4-12 ml/kg of dry laundry. The recommended dosage refers to the use of the product under optimal conditions. Consult Sanitec Service technical support for dosage adjustment.

QUANTUM BRIGHT

Concentrated bleach based on phthalimido-peroxy-hexanoic acid (PAP) for white, coloured and delicate fabrics

- Delivers professional laundry results from as low as 30° C, enabling energy savings, reduced cycle times and more efficient use of washing machines
- Reduces fabric wear compared to conventional bleaches, thanks to its lower activation temperature, ensuring longer linen lifespan and reduced operating costs over time
- Helps to prevent fabric yellowing caused by alkaline residues during the drying phase, even under conditions of low alkalinity

Directions: Optimised for use with Quantum system products. For use with L-Brain Connect automatic dosing systems only. It must be used during the pre-wash or wash phase.

Dosage: 3,5-8,5 ml/kg of dry laundry. The recommended dosage refers to the use of the product under optimal conditions. Consult Sanitec Service technical support for dosage adjustment.

15 L	Code	SN2070HC	Pcs x Box	1

L-BRAIN CONNECT ACCESSORIES

L-BRAIN CONNECT CONTROL UNIT

Dosing system with six peristaltic pumps

- Suitable for washing machines from 7 to 100 kg
- Consistently delivers products without loss of washing performance
- Exclusive dedicated software with storage and processing of washing statistics and energy consumption

Control unit	Code	240
	EAN	-
	Volume	-

TANK HOLDER BRACKET

Wall bracket for hanging the 5 L tank

- Tidier room
- Increased safety for operators

Wall bracket	Code	11847
	EAN	-
	Volume	1 pc

Made-to-measure cleaning with L-Brain Connect

L-Brain Connect is an intelligent dosing control unit that, through a Wi-Fi connection, allows you to control the entire wash cycle, detect system function and monitor associated costs.

Dosing system with **six peristaltic pumps** suitable for all professional washing machines

It **consistently delivers concentrated products** without losing washing performance

Real-time verification of the system's and its components' operation

Wi-Fi connection for remote control from PC, tablet and smartphone

Statistics with data on energy consumption and cleaning costs

Entering and editing washing programs remotely

Continuously evolving and constantly updated software

Reduced technical support costs by at least 40%

**MALFUNCTIONS
REDUCED TO ZERO**

**ASSISTANCE
ONLY WHEN NEEDED**

Alerting the laundromat manager by e-mail when a tank of product is about to run out

Possibility of checking and managing the customer's product stock directly from the software and then reordering goods

**AUTOMATIC LOGISTICS
MANAGEMENT**

WASHDET GREEN POWER | Floral

Skin care

Professional cosmetic solutions

Skin Laboratories is Sanitec's line of products dedicated to the care of all skin types, even the most sensitive. Ideal for residential care facilities, nursing homes, outpatient clinics and any other public or private healthcare facility.

The range offers specific formulas developed to meet different needs according to patient requirements.

Active ingredients according to patient needs

ZINC OXIDE

For a soothing action

It contributes to the regeneration of the epidermis by counteracting redness and erythema. It provides relief in the case of nappy rash in children, but also in the case of skin problems in adults or pressure sores in the elderly.

GLYCERIN

For a moisturising, emollient, hygroscopic, refreshing action

Thanks to its humectant and hygroscopic properties, it is able to absorb the humidity present in the air, increasing the skin's hydration state. IT IS a fundamental ingredient for all products that combat skin dehydration and that aim to provide an immediate sensation of relief.

PANTHENOL

For a moisturising, emollient and soothing action

Precursor of vitamin B (provitamin B5), it improves the barrier function of the skin by giving it elasticity and keeps it soft by aiding cell turnover. It has soothing, antiinflammatory and regenerative properties.

MACADAMIA OIL

For an emollient and elasticising action

It restores moisture and softness to dry and irritated skin. It has strong antioxidant and elasticising properties.

LIQUID SOAP GREEN POWER | Floral

Ecolabel-certified scented liquid soap with ingredients of natural origin

- EU Ecolabel-certified product with low environmental impact
- Gently cleanses hands and body

TOTAL BODY SOFT MOUSSE | Green tea

Soft, pH-neutral dermo-cleansing mousse with mild surfactants for the whole body, hair and intimate hygiene. With hyaluronic acid, glycerine, vitamin E and panthenol.

- Gently cleanses even the most sensitive areas thanks to its light texture, which allows non-abrasive cleansing with reduced rubbing and improved rinsing
- Free of sensitising preservatives, parabens, dyes, salt, EDTA, silicones, PEGs, paraffins and latex
- Mild fragrance (free of allergens listed in Annex III of EC Reg. 1223/2009) for a fresh feeling

Directions: Apply the product to the palm of the hand or with a cloth to the affected areas. Use it like a normal hand, body, intimate or shampoo cleanser, dosing it appropriately according to the area to be cleansed. Remove impurities and, depending on use, rinse with water.

Dosage: Ready to use.

SANITEC
Professional cleaning solutions

Stone and
metal surfaces

Stone and metal surfaces

Petranova

Sanitec Petranova is the professional cleaning line dedicated to the conservation cleaning and protection **of building and cladding materials**, natural and artificial stone and metal surfaces.

- **Conservative cleaning** of facades of public and private buildings
- **Cleaning of artefacts** of historical, artistic and monumental interest
- **Cleaning of natural and artificial stone surfaces**, fair-faced, high and low porosity stone surfaces such as travertine, tuff, sandstone, granite, porphyry, basalt, marble, Lecce stone, Noto stone, Serena stone, Sperone stone, Peperino stone, Trani stone, Luserna stone, terracotta, clinker, stoneware, cement and concrete mixes
- **Civil and industrial floor cleaning**
- **Graffiti and paint removal**
- **Elimination of saltpetre efflorescence**
- **End-of-site cleaning**
- **Metal and light alloy cleaning**
- **Protection of stone and metal surfaces**, preventing the absorption of water and pollutants

Cleaning of artefacts of historical and artistic value

PETRA 24[©]

patented formula

The product removes the most stubborn dirt, even centuries old, without attacking the treated surface, restoring it to its original splendour

Petra24[®] is an industrially patented product **designed for effective and targeted conservation cleaning** on all high and low porosity stone surfaces. Specifically for the treatment of civil buildings, it is particularly suitable for cleaning artefacts of historical, artistic and monumental interest.

- **Removes the most difficult dirt** respecting all surfaces, even the most delicate ones
- **Removes patinas, black crusts, sulfation stains, moulds, algae and lichens**
- **It is effective against the blackening** of facades by smog and hydrocarbons
- **Ready to use** and easy to apply
- **Leaves no streaks** or surface films. **It is solvent-free**
- **It has no abrasive or oxidising/whitening properties**
- **Does not alter the chemical-physical characteristics** of treated surfaces
- **Safe** for humans and environment
- Gel formula **to adhere to vertical surfaces**

PETRA 24®

Patented product

Gel cleaner for the conservative cleaning of all natural and artificial exposed stone surfaces, of high and low porosity

- Restores stone to its original splendour
- Removes the most stubborn dirt, even centuries old
- It removes patinas, sulfation stains (black crusts) and surface deposits of all kinds
- It is effective against smog and hydrocarbon dirt
- Respects the nature of the treated substrate

Uses: Public and private buildings, artefacts of historical, artistic and monumental interest. It is suitable for cleaning natural stone surfaces such as: travertine, tuff, marble, granite, slate, sandstone, porphyry, Serena stone, Lecce stone, Noto stone. And for cleaning artificial stone surfaces: exposed bricks, terracotta, clinker, stoneware, concrete, cement agglomerates

Directions: Apply the product to the surface to be cleaned, preferably dry. Using a brush or spatula, spread the product evenly, making sure to create a thickness of at least 2 mm. After application, cover the product with cling film. Wait 12 to 24 hours. Next, remove the film and proceed to wash using a low-pressure washer.

pH
8.5 - 9.5

POWER XP

Highly effective alkaline cleaner for deep cleaning of natural and artificial stone surfaces

- Restores the artifact to its original state
- Removes organic and industrial dirt
- Effectively removes greasy dirt, patinas, crusts, sulphation stains and surface deposits of all kinds

Uses: Exposed bricks, terracotta, clinker, stoneware, cement and cement agglomerates, natural stone surfaces – such as travertine, granite, porphyry, basalt, marble, sandstone

Directions: Apply the product, as is, directly to the surface to be cleaned using a brush or a spray dispenser. Leave the product on for a few minutes: the time may vary depending on the type of surface and the type of dirt. If possible, rub with a brush and/or brushes with bristles suitable for the surface being treated. Subsequently rinse the surface with a low-pressure washer or manually with a brush and/or sorghum brush previously dampened with water. It works in minutes. It does not leave unpleasant odours during use.

METAL BRO

Specific cleaner and deoxidiser for hard metal and light alloy surfaces

- Restores treated surfaces to their original splendour
- Cleans, deoxidizes and removes rust from all metal surfaces
- Removes limescale and oxidation
- Restores the original colour to surfaces such as copper (eliminates copper pesticide), brass and bronze
- Guarantees a long-lasting result. Respects the treated surfaces.
- Respects the treated surfaces

Uses: All metal surfaces such as bronze, copper, brass, steel and more.

Directions: Apply the product, as is, directly onto the surface to be cleaned using a brush, sponge or spray nozzle. Rub the surface clockwise and counterclockwise to loosen any dirt, using a cloth and/or sponge. Wait a few minutes - the time may vary depending on the type of dirt and surface - and rinse the surface. Easy to use. Non scratching.

GRAFFITI RM

Specific cleaning solvent for removing graffiti, inks and paints

- Effectively removes inks and paints from all natural and artificial, high and low porosity stone materials
- Safe product: non-flammable and not classified as dangerous for humans and the environment (easily biodegradable)
- Low VOC product: leaves no odours and does not release dangerous fumes

Uses: High and low porosity natural and artificial stone surfaces, unpainted metal surfaces

Directions: Apply the product, as is, on the dry surface with the help of a brush, sponge and/or spray nozzle. Leave the product on for a few minutes (about 15 minutes). Rub the surface to be cleaned vigorously using a brush, sponge or suitable bristle brushes, previously dampened with water. Rinse the surface with a cloth soaked in water, or with a low-pressure washer. Easy to use, and ready for use. It is not a flammable product, nor is it classified as dangerous to humans or the environment. Easily biodegradable. Low VOC product. It does not release dangerous fumes during its use, nor unpleasant odours. It can be used safely even indoors.

ACID SP

Descaling detergent made with hydrochloric acid for heavy soiling

- Quickly removes inorganic encrustations such as: limescale deposits, efflorescence from saltpetre, cement, plaster, rust
- Excellent for thoroughly cleaning newly laid floors
- Ideal for outdoor floors

Uses: All acid-resistant materials, terracotta surfaces, clinker, porcelain stoneware, glass mosaic, and all acid-resistant stones. Ideal for deep cleaning of newly laid floors

Directions: Dilute the product according to the recommended doses. Apply the product to the surface to be cleaned with a brush, sponge or spray. Leave the product on for a few minutes. Proceed to the rinsing phase using a pressure washer or manually with brushes wet with water.

Dosage: For deep cleaning of construction sites and removal of heavy dirt: dilute 200 - 250 ml/L (in a 1:3 - 1:4 ratio) of product with water. To remove saltpetre efflorescence and clean glass-ceramic coatings: dilute 110 - 150 ml/L (in a ratio of 1:6 - 1:8) of product with water.

AQUA

Water-based protective additive for hydrophobisation of all building materials

- The protective layer ensures effective protection against heavy rain and the accumulation of pollutants that are aggressive to surfaces
- Reduces water absorption
- Reduces the proliferation of mould or algae typical of stone products

Uses: Ideal for exposed natural and artificial stone surfaces. For surfaces such as concrete, terracotta and all medium-high porosity materials

Directions: Apply the product on dry surfaces without any surface dust. In the presence of highly absorbent surfaces, it is advisable to carry out two or more applications. It can be applied by brush, roller and spray. Dry any residue with a clean cloth.

Swimming pool

SWIMMING POOL WATER TREATMENT

DICHLOR 56%

Chlorine-based granular additive for water treatment

- Continuous protection over time thanks to the presence of a stabilizer, which keeps chlorine active for longer, reducing consumption and replenishment
- Stabilizes and protects chlorine from solar degradation, prolonging its effectiveness, up to 80% thanks to the formula based on highly stabilized isocyanuric acid.
- pH always under control thanks to the slightly acidic reaction dissolution, which helps keep water in its optimal balance

Directions: Manual dosing: the product can be dosed inside the skimmers. It can be dosed in the compensation tank or directly in the pool, making sure there are no swimmers present. For the optimal dose, consider 1 g per m³ of water raises the chlorine value by 0.55 mg/L. Automatic dosing: prepare a chlorinating solution with 10-30 g/L (1-3%) in water, adjust the dosers that deliver the chlorinating solution directly into the pool so as to obtain a chlorine content in the pool that complies with current regulations.

Dosage: 1-2 g every m³ of water per day. For best product performance, keep the water pH at 7.2. Consumption may vary depending on temperature, light intensity, attendance of the system and weather conditions.

pH

LIQUID CHLOR

Liquid chlorine 14-15% for swimming pool water treatment

- Effective in superchlorination treatments
- Can also be used without pre-dilution
- Contains raw materials with high oxidizing power

Directions and dosage: Automatic dosage: dose with a special dosing pump into the pool inlet water until 0.7-1.5 ppm of free active chlorine is obtained in the pool. Manual dosage: dose approximately 30-50 ml of product for each m³ of water in the skimmers, or in the compensation tank or directly in the pool if there are no swimmers. For best product performance, keep the water pH at 7.2.

pH
12.5 - 13.5

ANTI CHLOR

Liquid chlorine remover

- Quickly and effectively restores/reduces chlorine levels to normal
- Immediate savings because it avoids changing the water to reduce chlorine
- Safe for water and swimmers

Directions: Automatic dosing: dose with a special dosing pump into the pool inlet water. Manual dosing: dose the product into the compensation tank or directly into the pool if there are no swimmers.

Dosage: 4-5 ml of product per m³ of water reduces the chlorine value by about 1 ppm. CAUTION: do not pour product into skimmers. Avoid contact with iron, aluminium and brass.

pH

ALGHICIDA

Product for the treatment of algae in swimming pool water

- Total protection thanks to a broad-spectrum formula, helps keep water in perfect condition
- Suitable for preventive treatment of the formation and elimination of algae already present in the pool

Directions and dosage: Initial treatment: with the pool empty, apply the product as is directly to the walls and bottom. Once the pool is full, pour the product directly into the pool. Dosage 30-50 ml per m³ of water. Maintenance treatment: pour the product into the pool, 20-30 ml per m³ of water every week. Shock treatment: pour the product into the pool, 50-70 ml per m³ of water in addition to a superchlorination treatment bringing the free chlorine to 5 ppm. Treatments must be carried out in the absence of bathers in the pool.

pH

10 - 11

FLOCCULANT

Product for flocculation and clarification of swimming pool water

- Instantly clearer water thanks to the effective flocculation that aggregates and removes the finest particles responsible for turbidity
- Less encrustations and less correctors because regular use reduces deposits and consumption of pH-regulating products
- Targeted action on difficult waters because it is ideal against iron, manganese and ammonia, main causes of clouding

Directions: In skimmer pools, pour the product into the skimmers. In infinity pools, pour the product into the compensation tank near the water intake. CAUTION: do not use the product on filtration systems that use fossil meal such as diatomaceous earth.

Dosage: 0.6-2.5 ml per m³ of water

pH

1.5 - 2.5

pH+

Soda-based pH booster

- Maintains the correct pH at the optimal value of 7.2 - 7.4
- It has an adjuvant effect in the precipitation treatments of metals such as iron and manganese

Directions: Automatic dosing: dose with a special dosing pump into the pool inlet water. Manual dosing: dose the product into the compensation tank or directly into the pool if there are no swimmers.

Dosage: 6-7 ml of product per m³ of water raises the pH value by 0.1. CAUTION: do not pour product into skimmers.

pH

13 - 14

SWIMMING POOL WATER TREATMENT

pH-

Sulphuric Acid pH Reducer

- Maintains the correct pH at the optimal value of 7.2 - 7.4
- Prevents the formation of scale

Directions: Automatic dosing: dose with a special dosing pump into the pool inlet water. Manual dosing: dose the product into the compensation tank or directly into the pool if there are no swimmers.

Dosage: 6-7 ml of product per m³ of water lowers the pH value by 0.1. CAUTION: do not pour product into skimmers.

RUDERAL | Balsamic

Universal descaler made with hydrochloric acid for hard surfaces, for heavy fouling

- Quickly and effectively dissolves treated encrustations
- Suitable for the removal of stubborn limescale deposits and rust
- Ideal for extraordinary cleaning operations of floors and walls inside baths, swimming pools and spa areas

Directions: Dilute the product in water according to the instructions, spread it on the surfaces to be treated and leave it on for a few minutes. Scrub to remove stubborn build-up, then rinse with plenty of water.

Dosage: 20-40 ml/L (2-4 caps every 5 litres) depending on the degree of soiling.

Ecolabel

Sanitec Ecolabel Range

Excellent cleaning performance with reduced environmental impact

Within the Sanitec portfolio, **EU Ecolabel-certified products** stand out, designed to deliver high cleaning standards with increased attention to environmental impact.

Sanitec **EU Ecolabel-certified** formulations represent a responsible choice for professional cleaning: products that combine **excellent cleaning performance with strict environmental criteria**.

Choosing **EU Ecolabel-certified** products means relying on solutions that help **reduce environmental impact throughout the entire product life cycle**, from raw material selection and formulation to use and disposal. At the same time, they ensure **effectiveness, safety and quality**, meeting the needs of cleaning professionals and the expectations of facilities that are increasingly focused on sustainability.

The Sanitec Ecolabel range therefore enables a **more sustainable, efficient and responsible** approach to cleaning, without compromising on performance.

STOVIL GREEN POWER

Alkaline liquid detergent concentrate **Ecolabel-certified**, for mechanical dishwashing, for all water hardnesses

- EU Ecolabel-certified product with low environmental impact
- Effectively removes encrusted grease and food residues
- Prevents limescale build-up on dishes
- Excellent rinsability

Directions: To be used with Sanitec automatic dispensers, or in combination with dosing systems integrated into the machine when present.

Dosage: Adjust the dispenser to 1-3,5 ml/L depending on the degree of dirt and water hardness. The recommended dosage refers to the use of the product under optimal conditions. Consult Sanitec Service technical support for dosage adjustment.

BRILL GREEN POWER

Rinse aid, **Ecolabel-certified**, for mechanical dishwashing, for all water hardnesses

- EU Ecolabel-certified product with low environmental impact
- Speeds up the drying of dishes, also effective on plastic
- Eliminates bad odours
- Reduces limescale build-up on dishes

Directions: To be used with Sanitec automatic dispensers, or in combination with dosing systems integrated into the machine when present.

Dosage: Adjust the dispenser to 1-2 ml/L depending on the degree of dirt and water hardness. The recommended dosage refers to the use of the product under optimal conditions. Consult Sanitec Service technical support for dosage adjustment.

NEOPOL GREEN POWER | Unscented

Concentrated liquid detergent, **Ecolabel-certified**, for manual dishwashing

- EU Ecolabel-certified product with low environmental impact
- Effectively removes grease and organic dirt
- Eliminates odours from dishes
- Leaves dishes sparkling without streaks
- Effective cleaning with compact foam and immediate rinsing
- Product with neutral pH, dermatologically tested

Directions: Pour the dose of product into warm water, leave the dishes to soak for the time necessary to soften the dirt, when necessary use a sponge/brush directly on the stubborn dirt, then rinse and leave to dry.

Dosage: 1-1,2 ml/L per litre of water, depending on the degree of dirt.

DEKAL GREEN POWER

Ecolabel-certified acid descaler for removing limescale from tools, machines and equipment

- EU Ecolabel-certified product with low environmental impact
- When used regularly, it helps maintain the performance of the equipment and increases longevity
- Excellent for recirculating washing also due to its low foaming
- Safe on metals and all types of machinery

Directions: Small surfaces/stubborn dirt: apply the product as is directly to the surface to be cleaned, leave to act for a few minutes and then rub with a clean, damp cloth. Rinse thoroughly with water. Soaking: dilute the product at a concentration of 30 ml per litre of hot water (3 caps every 5 litres) depending on the extent of the encrustation. Leave to soak until the limescale deposit has dissolved. If necessary, use a sponge or brush to remove more stubborn limescale deposits. Rinse thoroughly with water. Spray Method: spray on the surface or equipment to be treated. Leave on and rub. Rinse thoroughly with water. Dishwasher/Washing Machine: make sure the machine is completely empty. Pour the product directly into the tray, 30 ml for every litre of water (3 caps for every 5 litres). Run an empty wash cycle at 50-60°C.

SURFACE GREEN POWER | Floral

Universal detergent, **Ecolabel-certified**, for floors and hard surfaces

- EU Ecolabel-certified product with low environmental impact
- Excellent degreasing power, removes all types of dirt
- Does not require rinsing and leaves no streaks
- Controlled foam can be used with mop method or with scrubbers

Directions: Ideal for all types of water-resistant washable floors. **Small surfaces/stubborn dirt:** Apply the product as is directly to the surface to be cleaned, leave on for a few minutes and then rub with a clean, damp cloth. Rinse with water. **Large surfaces/ordinary cleaning:** Dilute the product in water, apply the product to the surface to be washed with a mop or cloth. No rinsing required.

Dosage: 10-30 ml/L (Code 3109-S: 2-6 caps every 5 litres, Code 3105: 1-3 caps every 5 litres) depending on the degree of dirt.

Code	3109-S	Pcs x Box	6

IGIENIKAL GREEN POWER | Floral

Ecolabel-certified citric acid-based descaling detergent for bathrooms and bathroom fittings

- EU Ecolabel-certified product with low environmental impact
- Quickly dissolves greasy residues, soap residues and limescale residues from sinks, shower cubicles, taps, bathroom fittings, tiles, etc.
- Leaves surfaces shiny

Directions: Dispense the product directly onto the surface to be cleaned, allow it to act for a few minutes and then wipe with a clean, damp cloth. Rinse thoroughly with water.

Dosage: Ready to use.

Code	3103	Pcs x Box	6
EAN	8032680393686	Box x Lyr	21
Volume	750 ml	Box x Plt	105

WC GEL GREEN POWER | Pine

Descaling detergent with **Ecolabel certificate** made with citric acid and lactic acid for toilets and urinals

- EU Ecolabel-certified product with low environmental impact
- Effective in removing limescale and organic dirt
- It adheres perfectly to vertical surfaces thanks to the gel formula
- Quick and easy to apply thanks to the bottle with multi-jet action cap for a wide coverage of the surface to be cleaned

Directions: Run water into the toilet bowl/urinal. Apply the product around the bowl and on the water flow walls. Leave on for 15 minutes, scrub with a brush or abrasive cloth to remove more stubborn stains, then run water to rinse.

Dosage: Ready to use.

Code	1945	Pcs x Box	8
EAN	8050999570703	Box x Lyr	20
Volume	700 ml	Box x Plt	100

CRYSTAL GREEN POWER

Ecolabel-certified multi-purpose cleaner for glass, mirrors and dusting

- EU Ecolabel-certified product with low environmental impact
- Leaves surfaces clean and shiny without streaks
- Ideal for glass, mirrors and chrome plated surfaces

Directions: Dispense the product directly onto the surface to be cleaned and rub until completely dry.

Dosage: Ready to use.

QUANTUM BASIC

Concentrated alkaline sequestrant detergent

- Quantum System **Ecolabel-certified**, environmentally friendly
- Effectively removes dirt by increasing the alkalinity of the wash bath
- Avoids the redeposition of removed dirt on fibres due to formula with anti-redeposition agents
- Prevents greying of fabrics
- Suitable for delicate, coloured clothes and microfibre mops and cloths

Directions: For use with L-Brain Connect automatic dosing systems only. It must be used during the pre-wash or wash phase. For optimum results, we recommend using Quantum system products. Do not use on wool and delicates.

Dosage: 0,5-4 ml/kg of dry laundry. The recommended dosage refers to the use of the product under optimal conditions. Consult Sanitec Service technical support for dosage adjustment.

Disinfectants

Safety at your fingertips

Medical Surgical Device (in Italy: Presidio Medico Chirurgico (P.M.C.)) products are chemical solutions specially formulated to ensure the elimination of microorganisms such as bacteria, fungi and viruses from the environment. The P.M.C. offer Sanitec comprises a complete range of products designed to guarantee total safety in the ordinary and extraordinary disinfection process of all surfaces. Each product guarantees a specific level of disinfection and is designed to always ensure the most suitable solution for your needs.

- Guaranteed and safe sanitising process for guests
- Reducing the risk of contamination from environmental factors
- Compliance with ministerial requirements regarding sanitisation of treated areas
- Helps reduce the proliferation of bacteria, fungi and viruses
- Concentrated, ready-to-use solutions for surfaces and skin

Tested action: virucidal, fungicidal and bactericidal

Tests carried out by internationally accredited laboratories guarantee its effectiveness

P.M.C. products from the Sanitec surface care line have successfully passed microbiological activity tests: EN 1276 "Bactericidal activity with interfering substances", EN 1650 "Fungicidal activity with interfering substances". EN 13697 'Bactericidal/fungicidal activity surface test', Multi activ, Bakterio and Sanimed also passed the activity tests against viruses EN 14476 'Virucidal activity suspension test' and EN 16777 'Virucidal activity surface test'.

P.M.C. products from the Sanitec line for skin care have successfully passed the microbiological activity tests: EN 13727 "Bactericidal activity in suspension", EN 13624 "Fungicidal activity in suspension", EN 14476 "Virucidal activity in suspension test", in addition Sani gel med passed the specific test EN 1500 "Hygienic hand washing by rubbing" and securgerm med the specific test EN 1499 "Hygienic hand washing".

SANI ACTIVE | Unscented

Universal bactericidal and yeasticidal degreaser according to **Italian Ministry of Health**, Registration no. 20440.

- Eliminates 99,9% of bacteria and fungi
- Ideal in all cases where cleaning and disinfection are required in a single operation
- Disinfects and degreases all surfaces in the kitchen, bathroom, offices, and other public environments, cars and waste collection containers, even in the presence of stubborn dirt
- Also recommended for the agri-food and healthcare sectors, on food contact surfaces, and for those in contact with elderly people and children

Directions: For normal cleaning, spray directly to the surface to be treated and then dry with a cloth or paper. To disinfect, spray and leave on for at least 15 minutes, then dry with a cloth, paper or rinse.

Dosage: See the terms of use in the table.

MULTI ACTIV | Unscented

Ready-to-use disinfectant for surfaces according to **Italian Ministry of Health**, Registration no. 20058.

- Eliminates 99,9% of bacteria, fungi and viruses
- Cleans and eliminates bad odours
- Effectively removes gram-positive and gram-negative bacteria, fungi, moulds, and both enveloped and non-enveloped viruses from smooth surfaces, thanks to its formulation with active ingredients
- Suitable for disinfecting kitchens, bathrooms and all surfaces in contact with food

Directions: For normal cleaning, apply directly to the surface to be treated and then dry with a cloth or paper. For disinfection, leave on for at least 5 minutes to obtain bactericidal action or for at least 15 minutes to also obtain fungicidal and virucidal action. For virucidal action, apply the product to the previously cleaned surface. When disinfecting surfaces that may come into direct contact with food, rinse with potable water.

Dosage: See the terms of use in the table.

Alkyl dimethylbenzyl ammonium chloride 0,4 g/100 g

MULTI ACTIV | Lemon

Ready-to-use disinfectant for surfaces according to **Italian Ministry of Health**, Registration no. 20058.

- Eliminates 99,9% of bacteria, fungi and viruses
- Cleans and eliminates bad odours
- Effectively removes gram-positive and gram-negative bacteria, fungi, moulds, and both enveloped and non-enveloped viruses from smooth surfaces, thanks to its formulation with active ingredients
- Suitable for disinfecting kitchens, bathrooms and all surfaces in contact with food

Directions: For normal cleaning, apply directly to the surface to be treated and then dry with a cloth or paper. For disinfection, leave on for at least 5 minutes to obtain bactericidal action or for at least 15 minutes to also obtain fungicidal and virucidal action. For virucidal action, apply the product to the previously cleaned surface. When disinfecting surfaces that may come into direct contact with food, rinse with potable water.

Dosage: See the terms of use in the table.

Concentrated disinfectant for surfaces according to **Italian Ministry of Health**, Registration no. 20047

- Eliminates 99,9% of bacteria, fungi and viruses
- Fungicidal, bactericidal and virucidal action, active against gram-positive and gram-negative bacteria, fungi, moulds and viruses, both enveloped and non-enveloped, present in domestic and professional environments
- Particularly suitable for disinfecting surfaces and equipment in the agri-food, hotel and catering industries
- It is also suitable for use in high traffic environments, such as bathrooms in public places, outpatient clinics and hospital environments

Directions: Dilute SANIMED® in water and spray or spread with a sponge or mop. For small utensils, immerse the material to be disinfected. When disinfecting surfaces that may come into direct contact with food, rinse with potable water. For virucidal action, apply the product to the previously cleaned surface, in a 5% solution equal to 250 ml per 5 litres of water.

Dosage: For normal cleaning dilute SANIMED® at 0,5%, equal to 25 ml per 5 litres of water. For disinfection, dilute SANIMED® at 1,5%, equal to 75 ml per 5 litres of water and leave to act for at least 5 minutes for bactericidal activity or at least 15 minutes for fungicidal and virucidal activity.

Probiotics

SANITEC BIOX

The new range of probiotic detergents for effective cleaning action and long-lasting performance

The complex blend of the new SANITEC BIOX formulas, combining surfactants and biological activators - probiotics, eliminates odours and ensures effective and long-lasting cleaning action.

Ideal for all types of areas, to maintain a natural microbial balance and simplify the cleaning of all surfaces.

The benefits

Effective and longer-lasting cleaning

Removes organic dirt and residue, even within micro-pores. The probiotics continue to work even after application, reducing the need for frequent re-cleaning on the same surfaces.

Odour elimination

Acts on the organic molecules responsible for unpleasant odours, neutralising them and helping to keep areas fresher for longer.

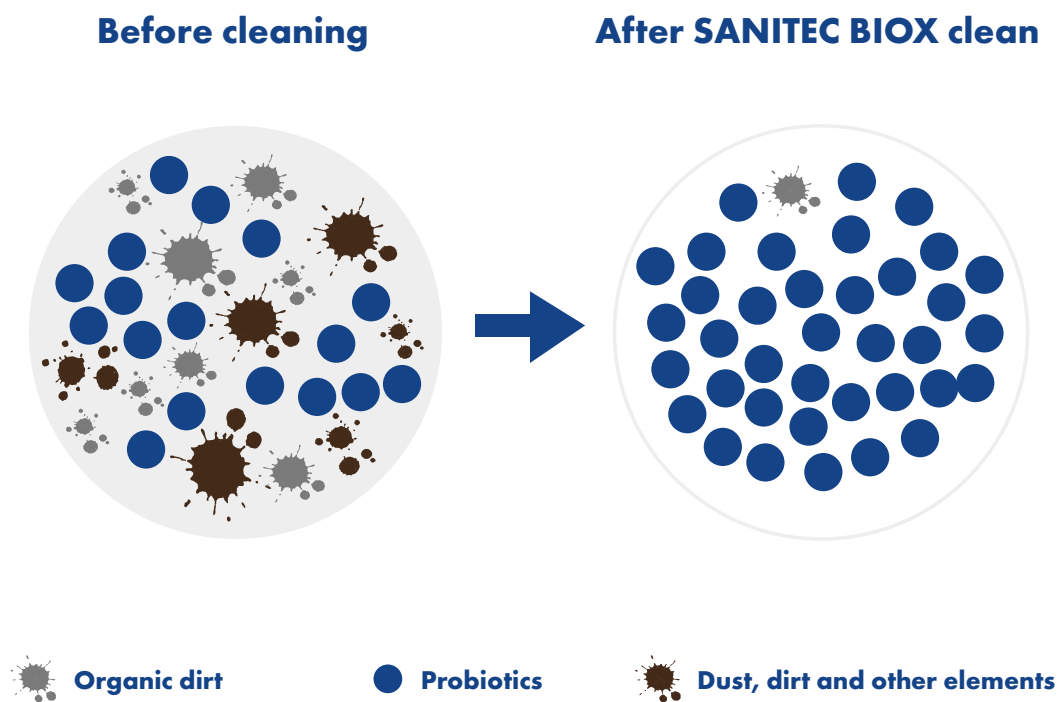

Care for areas and people

Promotes microbiological balance on treated surfaces, where beneficial microorganisms inhibit the growth of unwanted ones, ensuring a more stable and long-lasting level of cleanliness.

Probiotics

Probiotics are dormant microorganisms that become active upon contact with dirt present on surfaces and in environments. They also help maintain a favourable microbiological balance on treated surfaces.

Biological activation

The probiotics settle on treated surfaces, producing enzymes that break down organic dirt even within micro-pores. They then act on fats, starches and proteins responsible for unpleasant odours.

Prolonged action

The probiotics keep working even after application, continuing to break down residue over time.

Balanced microbiome for deep cleaning

The combination of surfactants and probiotics promotes a beneficial microbiome, helping to keep surfaces cleaner for longer.

PROBIOTIC DETERGENTS

BIOX MULTI | Floral

Probiotic detergent that eliminates odours for hard surfaces

- Removes dirt and ensures long-lasting cleaning performance
- Eliminates unpleasant odours, leaving areas fresh and pleasantly fragranced
- Promotes microbiological balance on treated surfaces, where beneficial microorganisms inhibit the growth of unwanted ones, ensuring a more stable and long-lasting level of cleanliness

Directions for use: Shake before use. Spray onto a clean cloth and wipe the surface. Allow the surface to dry. Suitable for all water-resistant surfaces.

Dosage: Ready to use.

BIOX DEO | Lemon

Probiotic odour-eliminating deodorising detergent for waste containers, bins and street litter bins

- Eliminates unpleasant odours and leaves a pleasant, long-lasting fragrance thanks to the combined action of odour-eliminating technology, probiotics and fragrance
- Cleans and sanitises
- Promotes microbiological balance on treated surfaces, where beneficial microorganisms inhibit the growth of unwanted ones, ensuring a more stable and long-lasting level of cleanliness

Directions for use: Shake before use. Distribute the product over the surface. Allow the surface to dry.

Suitable for all water-resistant surfaces. No rinsing required. Can be used as a refill for code SN9101.

Shake before use. For large surfaces, it can be used with the "Spray Maxi" lance. Distribute the product over the surface. Allow the surface to dry. Suitable for all water-resistant surfaces. No rinsing required.

Dosage: Ready to use.

BIOX SANITARY | Pine

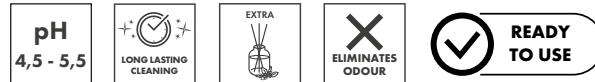

Probiotic odour-eliminating detergent for bathrooms and sanitary ware

- Eliminates unpleasant odours, leaving areas fresh and pleasantly fragranced
- Effective against dirt and odours in bathrooms, such as urine and organic residue
- Removes dirt and ensures long-lasting cleaning performance
- Promotes microbiological balance on treated surfaces, where beneficial microorganisms inhibit the growth of unwanted ones, ensuring a more stable and long-lasting level of cleanliness

Directions for use: Shake before use. Spray onto a clean cloth and wipe the surface. Allow the surface to dry. Suitable for all water-resistant surfaces. Ideal for cleaning hard surfaces such as tiles, grout and areas near drains, in high-humidity environments prone to the accumulation of organic residues and stubborn dirt.

Dosage: Ready to use.

Code	SN9106	Pcs x Box	6

BIOX DRAIN-CARE

Probiotic odour-eliminating detergent for drains, pipework and drainage channels

- Keeps drains clean and free-flowing
- Removes bad odours
- Regular use of the product keeps septic tanks, cesspits, grease traps and separators operating efficiently and reduces maintenance and disposal costs
- Promotes microbiological balance on treated surfaces, where beneficial microorganisms inhibit the growth of unwanted ones, ensuring a more stable and long-lasting level of cleanliness

Directions for use: Pour the product directly into the relative sink or drain using automatic or manual dosing systems. Shake before use. For best product performance, carry out the treatment after completing the cleaning procedures.

Dosage: Initial or shock treatment: 400-600 ml of product. Maintenance treatment: 120-180 ml of product once a week. Anti-odour treatment: apply directly to waste and surfaces diluted at 10-20 ml/L in water.
